

VedicDhaam

वैदिकधाम — वैदिक ज्ञान · आधुनिक मार्गदर्शन

Complete Project Documentation

सम्पूर्ण परियोजना विवरण — every page, feature, tool, data file and limitation explained

Project folder: H:\Pankaj\astrology

Next.js 16 · React 19 · Bilingual (English / हिंदी)

Prepared on 03 October 2026

Contents · विषय-सूची

1. Chapter 1 — Project Overview परियोजना परिचय

- 1.1 What is VedicDhaam?
- 1.2 Technology used
- 1.3 How to run the project
- 1.4 Folder structure
- 1.5 Complete site map (every URL)
- 1.6 What is saved in the browser (localStorage)
- 1.7 What is NOT built yet (important)

2. Chapter 2 — Core Setup, Layout, Navigation, Home Page & Design मूल ढाँचा, नेविगेशन, होम पेज एवं डिज़ाइन

- 1. Project configuration
- 2. app/ — root files
- 3. Language switching (lib/i18n.js)
- 4. Navigation (lib/nav.js)
- 5. Shared components (components/*.js)
- 6. Data and hooks (lib/)
- 7. Home page (components/home/HomeClient.js) — sections in order
- 8. KarmkandSection (components/home/KarmkandSection.js + karmkandSection.module.css)
- 9. ManobalSection (components/home/ManobalSection.js + manobalSection.module.css)
- 10. Design system (app/globals.css + modules)
- 11. public/ assets
- 12. Notable limitations (core / home)

3. Chapter 3 — Astrology Tools & Calculations ज्योतिष टूल्स एवं गणनाएँ

- 0. Things that apply to every page
- 1. LIBRARIES
- 2. PAGES
- 3. Accuracy summary

4. Chapter 4 — Jyotish Seekhen (Course) & Karmkand (Rituals) ज्योतिष सीखें एवं कर्मकांड

- SECTION A: "Jyotish Seekhen" (Learn Astrology), a free course
- SECTION B: "Karmkand" (Rituals: pooja method and pooja items)

5. Chapter 5 — Manobal — Mind, Career & Life Guidance मनोबल — मन, करियर एवं जीवन मार्गदर्शन

- 1. URL routes lib/manobal/career.js
- 2. Hub page (/manobal , ManobalHub.js) — layout top to bottom
- 3. Chapter page (ChapterView.js) — structure and data fields
- 4. Full chapter list (12 chapters, ~181 minutes total)
- 5. Interactive tools (components/manobal)
- 6. Career Compass (components/manobal/CareerCompass.js +
- 7. Self-Check screening (components/manobal/SelfCheck.js + lib/manobal/screening.js)
- 8. Help banner (components/manobal/HelpBanner.js)
- 9. Privacy
- 10. Disclaimers and limitations
- 11. Styling notes (CSS)

6. Appendix A — Every file in the project

Project Overview

परियोजना परिचय

1.1 What is VedicDhaam?

VedicDhaam (वैदिकधाम) is a bilingual (English + Hindi) website about Vedic astrology, Hindu rituals, astrology learning and mental wellbeing. It was built with **Next.js** (a React framework) and was designed from the reference picture `astro.png` in the project folder.

The site has **five big areas**:

#	Area	What the visitor gets	Main URL
1	Astrology tools	Free Janam Kundli (birth chart), daily/weekly/monthly Rashifal, love compatibility, Panchang with Rahu Kaal and Choghadiya, numerology, tarot, the 12 zodiac signs	<code>/birth-chart</code> , <code>/horoscope</code> , <code>/panchang</code> ...
2	Expert panel and booking	"हमारे विशेषज्ञ मंडल": 8 experts with Chat/Call buttons and a booking form	<code>/astrologers</code> , <code>/contact</code>
3	Jyotish Seekhen (Learn Astrology)	A free 12-lesson course in Hindi with quizzes and progress tracking	<code>/jyotish-seekhen</code>
4	Karmkand (Rituals)	Step-by-step method for 10 poojas with mantras, a "Pooja Mode", item checklists, and an encyclopedia of 57 pooja items	<code>/karmkand</code>
5	Manobal (Mind & Career)	12 chapters on stress, anxiety, sleep and exams, 7 practice tools, a GAD-7/PHQ-9 self-check and a Kundli-based Career Compass	<code>/manobal</code>

Everything runs **in the visitor's browser**. There is **no server, no database, no login system and no payment system** yet. Section 1.7 lists what is still missing.

1.2 Technology used

Item	Detail
Framework	Next.js 16 (App Router), React 19
Language	JavaScript (no TypeScript)
Styling	Plain CSS plus CSS Modules (one <code>.module.css</code> file per page or component); no Tailwind or UI library
Icons	<code>lucide-react</code> (the only extra package)
Fonts	Google Fonts via <code>next/font</code> : Poppins (headings), Mukta (body), Yatra One (decorative Hindi), Tiro Devanagari Sanskrit (mantras)
Images	No photos. All art is inline SVG, CSS gradients, emoji and Unicode symbols
Data	Hard-coded JavaScript files in the <code>lib/</code> folder

Item	Detail
Saving	The browser's <code>localStorage</code> only (per device)
Rendering	Every page is pre-built as static HTML (SSG); the interactive parts run in the browser
Package manager	npm (<code>package-lock.json</code>)

1.3 How to run the project

1. Install Node.js (version 20 or newer).
2. Open a terminal in the project folder `H:\Pankaj\astrology`.
3. Run `npm install` once, to download the packages.
4. Run `npm run dev` and open **`http://localhost:3000`** in a browser.
5. For a production build: `npm run build`, then `npm run start`.

There are no environment variables, API keys or database settings to configure.

1.4 Folder structure

Folder / file	What it contains
<code>app/</code>	All pages. Each folder is a URL (for example <code>app/panchang/</code> is <code>/panchang</code>). <code>layout.js</code> wraps every page with the Header, Footer and language system. <code>globals.css</code> is the site-wide design system.
<code>components/</code>	Shared building blocks: Header, Footer, Logo, PageHeader banner, Sign-In modal, Zodiac wheel, Newsletter form, Reveal (scroll animation), Icon
<code>components/home/</code>	Home page sections: hero carousel, expert cards, Karmkand and Manobal showcase sections, SEO text, FAQ
<code>components/manobal/</code>	The Manobal practice tools: breathing, grounding, thought record, mood tracker, focus timer, gratitude journal, career compass, self-check, help banner
<code>lib/</code>	Data and calculation logic: astronomy (<code>astro.js</code>), kundli, panchang, horoscope, compatibility, numerology, tarot, zodiac data, expert list, menu, home content, language system
<code>lib/jyotish/</code>	The 12 astrology lessons and progress saving
<code>lib/karmkand/</code>	The 10 poojas and the 57 samagri items
<code>lib/manobal/</code>	The 12 Manobal chapters, career test data, GAD-7/PHQ-9 questionnaires
<code>public/</code>	<code>icon.svg</code> (site icon) and <code>mandala.svg</code> (background pattern)
<code>astro.png</code>	Design reference image (not used by the code)
<code>package.json</code> , <code>next.config.mjs</code> , <code>jsconfig.json</code>	Project settings

The project has **125 source files with about 23,000 lines** (Appendix A lists every one).

1.5 Complete site map (every URL)

URL	Page	Type
/	Home page (19 sections)	Static
/astrologers	Our Panel of Experts (हमारे विशेषज्ञ मंडल)	Static
/contact	Book a Consultation (form)	Static
/birth-chart	Free Janam Kundli	Static, calculated in the browser
/horoscope	Daily / Weekly / Monthly Rashifal	Static
/compatibility	Love compatibility	Static
/panchang	Today's Panchang (#muhurat , #choghadiya sections)	Static, calculated in the browser
/numerology	Numerology calculator	Static
/tarot	Free tarot reading	Static
/zodiac	The 12 zodiac signs	Static
/zodiac/[sign]	Detail page per sign (12 pages: aries ... pisces)	Pre-built dynamic route
/jyotish-seekhen	Learn Astrology course hub	Static
/jyotish-seekhen/[slug]	12 lesson pages	Pre-built dynamic route
/karmkand	Karmkand introduction hub	Static
/karmkand/pooja-paddhati	List of 10 poojas	Static
/karmkand/pooja-paddhati/[slug]	10 pooja method pages	Pre-built dynamic route
/karmkand/pooja-samagri	Pooja items encyclopedia (57 items)	Static
/manobal	Manobal hub with toolkit	Static
/manobal/[slug]	12 chapter pages	Pre-built dynamic route
/manobal/self-check	Anxiety (GAD-7) and mood (PHQ-9) self-check	Static
/manobal/career-compass	Career Compass test	Static
any other URL	"Lost among the stars" 404 page	—

In total the build produces about **64 pages** (including the 404 page).

1.6 What is saved in the browser (localStorage)

Key	What it stores	Where it is used
vedicdhaam-lang	Chosen language (en / hi)	Whole site
vedicdhaam-jyotish-progress	Completed lesson slugs	Jyotish Seekhen
vedicdhaam-samagri-{pooja}	Ticked checklist items, one key per pooja	Karmkand pooja pages

Key	What it stores	Where it is used
vedicdhaam-manobal-progress	Completed chapters	Manobal
vedicdhaam-manobal-reflect-{chapter}	Answers to chapter reflection questions	Manobal chapters
vedicdhaam-manobal-thoughts	Thought-record entries	Manobal tool
vedicdhaam-manobal-mood	Daily mood log	Manobal tool
vedicdhaam-manobal-focus	Focus-timer sessions	Manobal tool
vedicdhaam-manobal-gratitude	Gratitude journal entries	Manobal tool

This data never leaves the device. It is lost if the visitor clears their browser data, and it does not carry over to another phone or computer.

1.7 What is NOT built yet (important)

1. **No backend:** no server code, API, database or email/SMS service.
2. **Sign-in is only a demo:** any valid-looking Indian mobile number plus any 4-digit OTP "signs in". No SMS is sent and no account is created.
3. **The booking form on /contact does not send anything.** It shows a success message after 1 second; no booking is stored and no payment is taken (plans shown at ₹499 / ₹999 / ₹1499).
4. **The newsletter form does not send anything.**
5. **Chat / Call / Watch Now** do not open a real chat, call or video. They only lead to the booking form or the experts page.
6. **Sample content:** blogs, videos, news, statistics ("5,000+ astrologers", "4 Crore+ customers"), testimonials, notifications and the "live" sessions are placeholders.
7. **Missing pages:** About, Privacy Policy, Terms, Refund Policy and Careers all point to /contact. Social media links and app-store badges go nowhere.
8. **Horoscope and compatibility text are not astrological:** the Rashifal comes from template sentences, and the compatibility "Guna Milan /36" is calculated from the two sun signs only (no real Ashtakoot matching).
9. **Kundli and Panchang use real astronomy,** simplified. Results are generally right at sign level; the Moon can be about 1° off. Only 16 built-in cities are offered, with fixed time zones and no daylight saving.
10. **Jyotish Seekhen and Karmkand are Hindi only,** even when the site is switched to English.
11. The `?focus=love` (etc.) links to the experts page are not used for filtering.
12. The `README.md` is a one-line placeholder.

Chapters 2–5 explain every part in full detail. Each chapter ends with the limitations of that area.

Core Setup, Layout, Navigation, Home Page & Design

मूल ढाँचा, नेविगेशन, होम पेज एवं डिज़ाइन

1. Project configuration

package.json

- name: `vedicdhaam`, version `1.0.0`, `private: true`.
- Scripts: `dev = next dev`, `build = next build`, `start = next start`. No lint or test script.
- Dependencies (only four): `next ^16.3.6`, `react ^19.3.0`, `react-dom ^19.3.0`, `lucide-react ^1.48.0` (icon library).
- No devDependencies, no TypeScript, no CSS framework (plain CSS + CSS Modules), no state library, no backend or database packages.
- No `"type": "module"` field (Node warns when importing lib files directly, but Next handles it fine).

next.config.mjs

- Only setting: `reactStrictMode: true`. No images config, redirects, i18n routing or env settings.

jsconfig.json

- `baseUrl: "."` and path alias `@/* -> ./*`. So `@/components/Header` means `<root>/components/Header`.

README.md

- One line only: `# vediccourse` (the file is saved in UTF-16 encoding, so it shows odd characters in some tools). The name does not match the project name "VedicDhaam" — the README is effectively a placeholder with no setup instructions.

.gitignore

- Ignores: `node_modules`, `.next`, `out`, `.env*.local`.

Other root items

- `astro.png` (about 5.6 MB) at the root — the design reference image the site was modelled on. Not used by the code.
- `package-lock.json` present (npm).

2. app/ — root files

app/layout.js (Root layout, server component)

- Loads four Google fonts through `next/font/google`, each exposed as a CSS variable, all with `display: 'swap'` and both `latin` and `devanagari` subsets:

Font	Weights	CSS variable	Used for
Poppins	500, 600, 700, 800, 900	<code>--font-display</code>	Headings, display text
Mukta	400, 500, 600, 700, 800	<code>--font-body</code>	Body text
Yatra One	400	<code>--font-deco</code>	Decorative Hindi text on the "आज का राशिफल" video thumbnails
Tiro Devanagari Sanskrit	400, normal + italic	<code>--font-sanskrit</code>	Sanskrit mantras/shlokas in the Karmkand section

Comment in code: Poppins and Mukta both ship Devanagari glyphs so Hindi and English share one typographic voice.

- `metadata:`
 - title default: "VedicDhaam — Vedic Astrology, Rashifal, Kundli & Panchang | वैदिकधाम"
 - title template: "%s · VedicDhaam" (sub-pages set their own title)
 - description: "Daily rashifal, free Janam Kundli, Kundli matching, Panchang, tarot, numerology and consultations with expert astrologers in Hindi and English. दैनिक राशिफल, मुफ्त कुंडली और पंचांग।"
 - keywords: vedic astrology, rashifal, kundli, panchang, horoscope, राशिफल, कुंडली, पंचांग, ज्योतिष
 - icons: `/icon.svg`
- `viewport.themeColor`: `#ffc21a` (saffron).
- Renders: `<html lang="en" data-lang="en" className={all four font variables}> -> <body> -> <LanguageProvider> wrapping <Header />, <main>{children}</main>, <Footer />. So every page shares the header, footer and language context.`

app/page.js (Home route "/")

- Server component that simply renders `<HomeClient />` (all home content is in `components/home/HomeClient.js`).

app/not-found.js (404 page)

- Rendered for unknown URLs. Uses the `T` inline-translation component.
- Content: eyebrow "Lost among the stars / सितारों में खो गए"; large gold "404" heading (font-size clamp(5rem, 14vw, 9rem)); text "This page has drifted beyond the known constellations. Let's guide you back home." (Hindi: "यह पृष्ठ ज्ञात नक्षत्रों से परे चला गया है। आइए आपको वापस ले चलें।").
- Two buttons: "Return Home / होम पर जाएँ" -> `/` (primary), "Today's Horoscope / आज का राशिफल" -> `/horoscope` (ghost).
- Min height 70vh, centered.

Routes that exist under app/ (for checking links)

`/`, `/astrologers`, `/birth-chart`, `/compatibility`, `/contact`, `/horoscope`, `/jyotish-seechen`, `/karmkand`, `/karmkand/pooja-paddhati`, `/karmkand/pooja-paddhati/[slug]`, `/karmkand/pooja-samagri`, `/manobal`, `/manobal/[slug]` (chapters), `/manobal/career-compass`, `/manobal/self-check`, `/numerology`, `/panchang` (has `#muhurat` and `#choghadiya` anchors), `/tarot`, `/zodiac`. There is NO separate About, Privacy, Terms, Blog, Video or News page.

3. Language switching (lib/i18n.js)

- File is a client module (`'use client'`).
- Content is authored inline as bilingual objects `{ en: '...', hi: '...' }` everywhere (nav, content, components). There are no separate translation JSON files and no URL-based locales (same URL for both languages).
- `LanguageProvider({ children })`:
 - State `lang`, initial value `'en'`.
 - On mount, reads `localStorage['vedicdhaam-lang']`; if it is `'hi'` or `'en'` it switches to that. (All `localStorage` access is wrapped in try/catch.)
 - Whenever `lang` changes it sets `document.documentElement.lang` and `document.documentElement.dataset.lang` (so `<html lang="hi" data-lang="hi">`). CSS uses `html[data-lang='hi']` selectors to adjust line-height and letter-spacing for Devanagari.
 - `setLang(next)`: updates state and saves to `localStorage['vedicdhaam-lang']`.
 - `t(v)`: returns `''` for null/undefined; returns strings/numbers as-is; otherwise returns `v[lang]`, falling back to `v.en`.
 - Provides `{ lang, setLang, t }` through React context.
- `useLang()`: hook returning that context. Default context value (outside provider) is English.
- `T({ en, hi })`: inline component, e.g. `<T en="Home" hi="होम" />`. Returns `hi` when `lang` is Hindi and a Hindi string exists, otherwise `en`. Used from server components such as Logo and not-found.
- Where the user switches: the `LangToggle` in the Header (buttons "Eng" and "हिंदी") — shown in the top bar on screens wider than 560px and always inside the mobile drawer.
- Behaviour note: the server always renders English first; a visitor who chose Hindi sees English briefly until the stored preference loads on the client (a short flash).

4. Navigation (lib/nav.js)

NAV — main header menu (in order). Items with children are dropdowns.

1. **Home / होम** -> `/`
2. **Consult Now / परामर्श लें** (dropdown)
 - Chat with Astrologer / ज्योतिषी से चैट करें -> `/astrologers`
 - Talk to Astrologer / ज्योतिषी से बात करें -> `/astrologers`
 - Book a Reading / परामर्श बुक करें -> `/contact`
3. **Horoscope / राशिफल** -> `/horoscope`
4. **Year 2026 / वर्ष 2026** (dropdown)

- Rashifal 2026 / राशिफल 2026 -> </horoscope?period=monthly>
- Love Horoscope 2026 / प्रेम राशिफल 2026 -> </compatibility>
- Numerology 2026 / अंक ज्योतिष 2026 -> </numerology>

5. **Panchang / पंचांग** (dropdown)

- Today's Panchang / आज का पंचांग -> </panchang>
- Choghadiya / चौघड़िया -> </panchang#choghadiya>
- Rahu Kaal & Muhurat / राहु काल और मुहूर्त -> </panchang#muhurat>

6. **Kundli / कुंडली** (dropdown)

- Free Kundli / मुफ्त कुंडली -> </birth-chart>
- Kundli Matching / कुंडली मिलान -> </compatibility>
- Zodiac Signs / राशियाँ -> </zodiac>

7. **Karmkand / कर्मकांड** (dropdown)

- What is Karmkand / कर्मकांड परिचय -> </karmkand>
- Pooja Paddhati (Rituals) / पूजा पद्धति -> </karmkand/pooja-paddhati>
- Pooja Samagri (Items) / पूजा सामग्री -> </karmkand/pooja-samagri>
- Daily Pooja Vidhi / दैनिक पूजा विधि -> </karmkand/pooja-paddhati/dainik-pooja>
- Havan Vidhi / हवन विधि -> </karmkand/pooja-paddhati/havan-vidhi>

8. **Learn Astrology / ज्योतिष सीखें** -> </jyotish-seechen> — badge "Free / मुफ्त" (saffron)

9. **Free Readings / मुफ्त रीडिंग** (dropdown)

- Birth Chart / जन्म कुंडली -> </birth-chart>
- Love Compatibility / प्रेम अनुकूलता -> </compatibility>
- Tarot Reading / टैरो रीडिंग -> </tarot>
- Numerology / अंक ज्योतिष -> </numerology>
- Zodiac Signs / राशियाँ -> </zodiac>

10. **Live / लाइव** -> [#live](/#live) (scrolls to "Free Live Experts" on the home page) — badge "Watch / देखें" (red tone)

11. **Manobal / मनोबल** (dropdown) — badge "New / नया" (teal tone)

- Mind & Career Guidance / मन एवं करियर मार्गदर्शन -> </manobal>
- Start the 12 chapters / 12 अध्याय आरंभ करें -> </manobal/man-ko-samjhen>
- Career Compass / करियर कम्पास -> </manobal/career-compass>
- Anxiety & Mood Self-Check / चिंता एवं मनोदशा स्व-जाँच -> </manobal/self-check>
- Exam Stress Help / परीक्षा तनाव सहायता -> </manobal/pariksha-ka-tanav>

12. **Calculators / कैलकुलेटर** (dropdown) — badge "New / नया" (default saffron tone)

- Life Path Number / मूलांक / भाग्यांक -> </numerology>
- Love Calculator / लव कैलकुलेटर -> </compatibility>
- Moon Sign Calculator / चंद्र राशि कैलकुलेटर -> </birth-chart>
- Nakshatra Finder / नक्षत्र खोजें -> </panchang>

Note: several menu items point to the same page (e.g. "Chat" and "Talk" both go to </astrologers>; "Love Horoscope 2026", "Love Calculator", "Kundli Matching" all go to </compatibility>). The "2026" items do not have dedicated 2026 pages.

NAV_LINKS — flat list used by the footer "Free Services" column

Horoscope </horoscope>; Panchang </panchang>; Free Kundli </birth-chart>; Kundli Matching </compatibility>; Zodiac Signs </zodiac>; Tarot Reading </tarot>; Numerology </numerology>; Pooja Vidhi </karmkand/pooja-paddhati>; Pooja Samagri </karmkand/pooja-samagri>; Learn Astrology </jyotish-seekeen>; Manobal — Mind & Career </manobal>; Career Compass </manobal/career-compass>. (All bilingual.)

5. Shared components (components/*.js)

Header.js (client component) + Header.module.css

- **Exports:** default `Header`. Internal `LangToggle({ className })`.
- **Static data:** `NOTIFICATIONS` (3 hard-coded items):
 1. Sun icon — "Your daily horoscope is ready. See what today holds!" -> </horoscope>, time "Just now / अभी"
 2. CalendarDays icon — "Check today's Panchang, Rahu Kaal and auspicious muhurat." -> </panchang>, "1h ago / 1 घंटा पहले"
 3. Sparkles icon — "New: Free Kundli matching for marriage." -> </compatibility>, "Today / आज"
- **State:** `scrolled` (window.scrolly > 10 adds a shadow), `menuOpen` (mobile drawer), `expanded` (which drawer group is open, index or null), `bellOpen` (notifications popup), `signIn` (Sign-In modal open). `bellRef` for outside-click detection.
- **Effects / behaviour:**
 - Scroll listener (passive) sets `scrolled`.
 - On route change (pathname) closes drawer and bell popup.
 - While the drawer is open, `document.body.style.overflow = 'hidden'` (locks page scroll).
 - Escape key closes drawer and bell popup; mousedown outside the bell area closes the bell popup.
 - `isActive(item)`: highlights a nav item if the current path starts with any of its (or its children's) paths, ignoring `?` and `#`; Home is active only on exactly `/`.
- **Layout:**
 - Fixed header (z-index 100), translucent cream background `rgba(255,253,248,0.94)` with 14px backdrop blur.
 - Top row (72px tall): Logo on the left; on the right: LangToggle ("Eng" | "हिंदी", with a Languages icon), bell button (red dot always shown), "Sign In / साइन इन" primary button, burger button (mobile only).
 - Second row: horizontal nav bar (54px tall, white, centered) generated from `NAV`. Dropdown items are `<button>`s with a ChevronDown that rotates on hover; dropdown panel appears on hover or keyboard focus (`:focus-within`), with a 3px saffron top border. Links get a saffron underline bar animation on hover/active. Badges are small pills positioned above the label ("Free" saffron, "Watch" red `#ff7d6e`, "New" teal `#2a9d8f` for Manobal / saffron for Calculators).
 - Mobile drawer (`<aside id="mobile-drawer">`): slides in from the right, width min(360px, 88vw), with dark overlay `rgba(42,26,11,0.45)`. Contains Logo + close (X), LangToggle, accordion nav (groups expand/collapse with an animated grid-rows transition), and a full-width "Sign In" button that closes the drawer and opens the modal. Tab order is managed with `tabIndex` so hidden links are not focusable.
 - Renders `<SignInModal open={signIn} onClose=... />`.

- **Breakpoints:** ≤1240px nav links get smaller padding/font; ≤1080px desktop nav hidden and burger shown; ≤560px language toggle and Sign-In button hidden from the top bar (still in the drawer) and the bell popup becomes full-width fixed below the header.
- **Limitation:** notifications are static sample text; the red dot never clears.

Footer.js (client component) + Footer.module.css

- **Structure:** dark band (`#2b2b2b` background, text `#e9e5dc`), 4px saffron gradient strip on top, giant faint "ॐ" watermark in the bottom-right corner.
- **Column 1 — Brand:** Logo (light variant); text "Trusted Vedic astrology, daily rashifal, Kundli, Panchang and expert consultations in Hindi and English."; heading "VedicDhaam Mobile Apps" with two store badges ("GET IT ON Google Play", "Download on the App Store") — these are plain `<span>`s, NOT links; heading "Follow us on" with 5 social icons (Facebook #1877f2, YouTube #ff0000, Instagram #e1306c, X #111, LinkedIn #0a66c2) — each has `href="#"` and `preventDefault`, so they go nowhere.
- **Column 2 — Quick Links / त्वरित लिंक (QUICK):** Astrologers `/astrologers`; Love Astrologer `/astrologers?focus=love`; Marriage Astrologer `/astrologers?focus=marriage`; Career Astrologer `/astrologers?focus=career`; Financial Astrologer `/astrologers?focus=money`; Tarot Readers `/tarot`; Numerologist `/numerology`; Vastu Experts `/contact`; Free Astrology Consultation `/contact`.
- **Column 3 — Free Services / मुफ्त सेवाएँ:** the 12 `NAV_LINKS` listed above.
- **Column 4 — Useful Links / उपयोगी लिंक (USEFUL):** About Us `/contact`; Contact Us `/contact`; Astrologer Registration `/contact`; Partner With Us `/contact`; Careers `/contact`; Refund Policy `/contact`; Media Coverage `/#news`; Videos `/#videos`; Blog `/#blogs`. Then heading "Weekly Rashifal by Email / ईमेल पर साप्ताहिक राशिफल" + `<NewsletterForm />`.
- **Bottom bar:** "© {current year} VedicDhaam. All rights reserved. / सर्वाधिकार सुरक्षित।" and legal links: Privacy Policy -> `/contact`; FAQs -> `/#blogs`; T&C -> `/contact`.
- **Grid:** columns 1.5fr 1fr 1fr 1.2fr; 2 columns at ≤1000px; 1 column at ≤560px.
- **Limitations:** About, Careers, Refund Policy, Privacy, T&C all just go to `/contact` (no real pages). The `?focus=` query on `/astrologers` is not read by the astrologers page (no filtering happens). "FAQs" points to `#blogs`, not to the FAQ section (which has no anchor id).

NewsletterForm.js (client) — uses Footer.module.css

- State: `email`, `status` ('idle' | 'error' | 'done').
- On submit: validates with regex `^\S+@\S+\.\S+$`. Invalid -> red border + "Please enter a valid email." Valid -> shows "◆ You're subscribed! Watch your inbox every Monday." and clears the field.
- **Limitation:** nothing is sent anywhere — no API call, no storage. Purely a front-end success message.

Logo.js (server component) + Logo.module.css

- Prop: `light` (boolean, default false; white text for the dark footer).
- Renders a link to `/` (aria-label "VedicDhaam home"): a 46×46 SVG sun (16 rays, alternating opacity, gold gradient `#ffd65a` -> `#e88a00`, inner white ring) that rotates slowly (spin 40s infinite), with the "ॐ" glyph centered on top; wordmark "Vedic" + "Dhaam" (Dhaam in gold gradient text), Poppins 800, 1.55rem; tagline "Ancient Wisdom · Modern Guidance / वैदिक ज्ञान · आधुनिक मार्गदर्शन" in small uppercase.
- ≤400px: tagline hidden, name shrinks to 1.35rem.

Icon.js (server-safe)

- `Icon({ name, size = 24, strokeWidth = 1.6, className })` — renders a lucide-react icon by string name. Supported names: Award, Briefcase, BrainCircuit, CalendarDays, Eye, Flame, Flower2, Gem, Globe, Grid3x3, Hand, Hash, Heart, House, IndianRupee, Layers, Orbit, PhoneCall, Sparkles, Star, Sun, Users, Venus. Special name `"om"` renders the "ॐ" character instead. Unknown names render nothing.
- Lets data files (lib/content.js) reference icons as strings.

PageHeader.js (client) + PageHeader.module.css

- Props (each a plain string or `{en, hi}`): `eyebrow`, `title`, `highlight` (gold-gradient second part of the title), `lead` (paragraph), `crumb` (breadcrumb label; falls back to title).
- Renders the standard banner used at the top of inner pages: rounded cream-to-gold gradient box (`#fff4d6` -> `#ffe7a8` -> `#ffd27a`) with mandala watermark, breadcrumb "Home > {crumb}" top-left, eyebrow, H1, lead text, big faint "ॐ" bottom-right. Uses `fade-up` animations with 80ms/160ms delays.
- Used by inner pages (astrologers, birth-chart, compatibility, contact, horoscope, jyotish-seekhen, karmkand, numerology, panchang, tarot, zodiac, etc.), not by the home page.

Reveal.js (client)

- `Reveal({ as = 'div', delay = 0, className, children, ...rest })` — wrapper that adds class `reveal` (starts invisible and shifted 26px down) and, via IntersectionObserver (threshold 0.12, rootMargin bottom -40px), adds `is-visible` once when scrolled into view, fading it in. `delay` sets `transitionDelay` in ms. Observer disconnects after the first reveal.

SignInModal.js (client) + SignInModal.module.css

- Props: `open` (bool), `onClose` (function).
- State: `step` ('phone' -> 'otp' -> 'done'), `phone`, `otp`, `error`.
- On open: resets everything, focuses the phone input after 50ms, Escape closes. Clicking the backdrop closes; clicks inside the dialog don't.
- Step 1 "Sign in to VedicDhaam" / "Get your first consultation FREE.": "+91" prefix + mobile input (digits only, max 10). Validation regex `^[6-9]\d{9}$` (Indian mobile). Error: "Enter a valid 10-digit mobile number." Button "Get OTP".
- Step 2: "OTP sent to +91 {phone}" with a "Change" link back to step 1; 4-digit OTP input (digits only, large spaced text). Any 4 digits pass (`^\d{4}$`). Button "Verify & Continue".
- Step 3: "Welcome to VedicDhaam!" / "You are signed in. Your first consultation is on us." + "Start Exploring" button (closes).
- Footer line: shield icon "100% private & secure" (green).
- Look: centered white card max 420px, mandala in the top-right, saffron circle with "ॐ", blurred dark backdrop (z-index 200).
- **Limitation (stated in a code comment):** "There is no backend yet, so the OTP step is simulated." No SMS is sent, any 4-digit code is accepted, nothing is stored, and the header does not change after "signing in" (the Sign In button stays; reopening restarts at step 1). There are no user accounts.

ZodiacWheel.js (server-safe) + ZodiacWheel.module.css

- Decorative animated SVG (400×400 viewBox, aria-hidden) used in the "Kundli" hero slide.

- Outer ring (radius 190 and 150, gold gradient `#f8e3ae / #e9c47a / #a8773a`) with 72 tick marks (every 5°, longer every 30°) and the 12 zodiac glyphs from `SIGNS` (lib/zodiac.js) — rotates once every 120s.
- Inner ring (radius 120 dashed lavender `#b79cff`, radius 100 filled deep indigo radial gradient) with a hexagram (two triangles) and 12 gold dots — counter-rotates every 80s.
- Centre: gold sun disc (r 38) with glow and a dark crescent moon shape.
- Two orbiting "planets" (lavender 12px orbiting every 22s, pink 8px every 34s reverse); a pulsing blurred glow behind (6s).
- Numbers are rounded (`fmt`) so server and client SVG markup match.
- Max width 540px, square aspect ratio.

6. Data and hooks (lib/)

lib/content.js — home page content (all bilingual via `p(en, hi)`)

- `HERO_SLIDES` (3):
 1. id `love`, tone `saffron`, art `love`: "Enjoy your relationship" / "don't stress over it" (Hindi sub: "चिंता छोड़ें, सितारों से पूछें"), CTA "Consult for FREE" -> `/astrologers`
 2. id `kundli`, tone `night`, art `wheel`: "Your Kundli, decoded" / "Free Janam Kundli in 30 seconds", CTA "Generate Free Kundli" -> `/birth-chart`
 3. id `panchang`, tone `sunrise`, art `diya`: "Every day, an auspicious start" / "Tithi, Nakshatra, Rahu Kaal & Muhurat", CTA "See Today's Panchang" -> `/panchang`
 - `QUICK_ACTIONS` (4): Talk to Astrologer (PhoneCall) `/astrologers`; Love (Heart) `/compatibility`; Horoscope (Sun) `/horoscope`; Kundli (Grid3x3) `/birth-chart`.
 - `APPOINTMENTS` (5): Reiki Healer (Hand) `/contact`; Popular Astrologers (Star) `/astrologers`; Learn Tarot (Layers) `/tarot`; Rudra Abhishek Pooja (om) `/karmkand/pooja-paddhati/rudrabhishek`; Palm Reader (Eye) `/contact`.
 - `READINGS` (12): Match Making (Gem) `/compatibility`; Kundli (Grid3x3) `/birth-chart`; Planet Transits (Orbit) `/horoscope?period=monthly`; Havan & Remedies (Flame) `/karmkand/pooja-paddhati/havan-vidhi`; Love (Heart) `/compatibility`; Panchang (CalendarDays) `/panchang`; Tarot Reading (Layers) `/tarot`; Numerology (Hash) `/numerology`; Vastu (House) `/contact`; Zodiac Signs (Sun) `/zodiac`; Festivals (Sparkles) `/karmkand/pooja-paddhati/lakshmi-poojan`; Pooja Vidhi (Flower2) `/karmkand`.
 - `CONSULT_TOPICS` (6, keys used as `?focus=`): love "Love & Relationship" (Heart); marriage "Marriage & Kundli" (Users); career "Career" (Briefcase); woman "Woman Astrologer" (Venus); business "Business" (BrainCircuit); money "Money" (IndianRupee).
 - `BLOGS` (3, sample teasers, no real articles):
 1. art `weekly`, kicker "Weekly Horoscope", "Weekly Horoscope: Is there something important you are about to miss?", author "Tarot Meenakshi", 5 days ago, -> `/horoscope?period=weekly`
 2. art `palm`, kicker "Palmistry", "What does a mole on the right hand mean?", "Team VedicDhaam", 4 days ago, -> `/contact`
 3. art `ganesh`, kicker "Festivals", "Why should we not see the Moon on Ganesh Chaturthi?", "Team VedicDhaam", 4 days ago, -> `/panchang`
 - `VIDEOS` (3, placeholders): indigo "VedicDhaam: Your guide to love and success!" 2:14; rose "Give your marriage problems 'The End' with the right guidance" 4:52; saffron "Your life director is now yours | First chat
-

free" 3:08.

- **NEWS** (3, sample): "The Daily Star Times" — "How modern couples are embracing Kundli matching before weddings" (24 days ago); "Lifestyle Weekly" — "Gemstones and purpose: the rise of spiritual jewellery" (24 days); "Startup Chronicle" — "How VedicDhaam blends technology with ancient Vedic wisdom" (134 days).
- **STATS** (4): "5,000+ Verified Astrologers" (Users); "25+ Years Of Excellence" (Award); "4 Crore+ Happy Customers" (Heart); "85+ Countries" (Globe). These are hard-coded marketing figures, not live data.
- **TESTIMONIALS** (6): Shalini K. (Delhi), Nikhil R. (Pune), Deepa P. (Jaipur), Arjun M. (Lucknow), Priya S. (Mumbai), Rahul T. (Indore) — each with an English and Hindi quote (sample content).
- **FAQS** (8): What is Astrology?; How to calculate Zodiac or Astrology sign?; Are astrology predictions true?; What are the benefits of VedicDhaam's consultation services?; Is astrology real?; What is my astrological sign?; How do I find astrology with my date of birth?; What is the meaning of astrology? — each with full bilingual answers.

lib/astrologers.js — expert panel

- **SKILLS** map: counseling (Counselling/काउंसलिंग), palm (Palmistry/हस्तरेखा), tantra (Tantra Vigyan/तंत्र-विज्ञान), shastra (Shastra/शास्त्र), jyotish (Jyotish/ज्योतिष), karmkand (Karmkand/कर्मकांड), prashna (Prashna Jyotish/प्रश्न ज्योतिष), vastu (Vastu/वास्तु).
- **PANEL_INTRO**: bilingual paragraph describing the panel of experts across Jyotish, Shastra, Karmkand, Vastu, Tantra Vigyan, Palmistry and Counselling.
- **ASTROLOGERS** (8; each has id, bilingual name/title/bio, skills array, **hue** for avatar colour):
 1. Ashish Kumar Ji — Counselling & Guidance Expert — [counseling] — hue 200
 2. Puneet Sharma Ji — Palmistry Expert — [palm] — hue 330
 3. Pankaj Kumar Ji — Tantra Vigyan Expert — [tantra] — hue 280
 4. Dr. Umesh Kumar — Shastra Expert — [shastra] — hue 18
 5. Dr. Dinesh Shastri — Jyotish Expert — [jyotish] — hue 28
 6. Acharya Nishant Sharma Ji — Jyotish & Karmkand Expert — [jyotish, karmkand] — hue 45
 7. Dr. Tushar Sharma — Prashna Jyotish & Vastu Expert — [prashna, vastu] — hue 160
 8. Dr. Tarun Shastri — Jyotish Alankar & Shastra Expert — [jyotish, shastra] — hue 10
- **LIVE_SESSIONS** (5): astro 5 "What does your planet say?"; astro 7 "Vastu for a happy home"; astro 2 "What do your palm lines say?"; astro 6 "Pitru Paksha remedies"; astro 1 "Finding clarity in tough times".
- Helpers: `getAstrologer(id)`; `expertNo(astro)` -> zero-padded id ("01"); `initials(name)` -> strips "Acharya/Pandit/Dr." prefix and trailing "Ji", returns first letters of first two words (e.g. "AK"). No photos — avatars are coloured initials circles.

lib/useStoredState.js

- `useStoredState(key, initial)` -> `[value, update, loaded]`. A `useState` that persists to localStorage as JSON on this device only. Reads after mount (avoids hydration mismatch), never throws if storage is blocked. `update` accepts a value or updater function.
- `todayKey()` -> local date string `YYYY-MM-DD`.
- Not used by the core/home files; used by the Manobal tools with keys `vedicdhaam-manobal-focus`, `vedicdhaam-manobal-gratitude`, `vedicdhaam-manobal-mood`, `vedicdhaam-manobal-thoughts`. (Other localStorage keys elsewhere in the app: `vedicdhaam-manobal-progress`, chapter answer keys, and per-pooja samagri checklist keys.)

lib/useToday.js

- `useToday()` -> the visitor's current `Date`, set only after mount (null during server render) so server markup never disagrees with the browser timezone.
- `formatDate(date, opts)` -> `toLocaleDateString('en-US', ...)`, default "weekday, month day, year"; returns "" for null.

localStorage keys used by the core files

- `vedicdhaam-lang` — chosen language ('en' or 'hi'). This is the only key the core/home files use.

7. Home page (components/home/HomeClient.js) — sections in order

HomeClient is a client component. Page wrapper `.home` has top padding = header height + 16px. Helper components inside the file:

- `RowHead({ title, href, id, om })` — section heading row: H2 (optional saffron "ॐ" before it), a thin fading line, and an optional "View All / सभी देखें" pill link on the right. `id` creates the anchor.
- `Avatar({ astro, size = 88, online })` (exported) — coloured circle using the astrologer's `hue` (HSL radial gradient) with English initials; optional green online dot.
- `AstrologerCard({ astro })` (exported) — card with Avatar (72px), expert number badge ("01"), name + blue verified check, star + title, bio, skills joined with " · ", and two green outline buttons: "CHAT" -> `/contact?astro={id}&mode=chat`, "CALL" -> `/contact?astro={id}&mode=call` (the contact page reads both params and pre-selects them).
- `LiveCard({ session })` — deep indigo card with red blinking "LIVE" badge, avatar (56px), "+ Follow / ✓ Follow" toggle (local state only, not saved), expert name, topic pill, and red "WATCH NOW" bar -> `/astrologers`.
- Date helpers: `fmtDate(date, lang, opts)` uses `hi-IN` or `en-IN` locale; `daysBefore(today, n)`.

Sections, top to bottom:

1. **Hero carousel** (`Hero`) — 3 slides from `HERO_SLIDES` (see `lib/content.js`). Each slide: H1 title, subtitle, saffron pill CTA button, badge "#1 India's Trusted Vedic Astrology Platform" (Hindi: "भारत का विश्वसनीय वैदिक ज्योतिष मंच"), and artwork on the right (`HeroArt`): slide 1 = constellation heart, slide 2 = ZodiacWheel, slide 3 = glowing diya. Auto-advances every 6.5 seconds; pauses while the mouse is over it; previous/next arrow buttons (appear on hover; hidden ≤860px); dot indicators (active dot stretches to 26px). Slides move with a 0.9s slide transition. Backgrounds: saffron (cream-gold gradient), night (deep purple `#1b0f3a` -> `#3b1a6b`, white text), sunrise (peach `#ffe8d1` -> `#ffb27a`).
2. **Quick actions** — white floating bar overlapping the hero bottom (-34px), 4 cards: Talk to Astrologer, Love, Horoscope, Kundli, each with a saffron round icon and arrow; fade-up with 80ms stagger. 2 columns ≤860px.
3. **Our Panel of Experts / हमारे विशेषज्ञ मंडल** (View All -> `/astrologers`) — first 3 astrologers as `AstrologerCard`s (3 columns; 2 at ≤1100px with the 3rd hidden; swipeable rail on phones).
4. **Free Live Experts / मुफ्त लाइव विशेषज्ञ** (anchor `#live`, View All -> `/astrologers`) — 5 `LiveCard`s from `LIVE_SESSIONS` (5 columns; 3 at ≤1100px; rail on phones).
5. **Schedule Appointment / अपॉइंटमेंट बुक करें** (View All -> `/contact`) — 5 cream tiles with mandala background: Reiki Healer, Popular Astrologers, Learn Tarot, Rudra Abhishek Pooja (ॐ icon), Palm Reader.

6. **Today's Astrology Prediction / आज का राशिफल** (with ॐ, View All -> </horoscope>) — grid of all 12 zodiac signs (6 columns; 4 at ≤860px; 3 at ≤560px). Each: gold glyph in a ring medallion (ring rotates 120° on hover), sign name and date range (localized to Hindi with `localizeSign`), linking to `/horoscope?sign={slug}`. Signs: Aries (Mar 21 – Apr 19), Taurus (Apr 20 – May 20), Gemini (May 21 – Jun 20), Cancer (Jun 21 – Jul 22), Leo (Jul 23 – Aug 22), Virgo (Aug 23 – Sep 22), Libra (Sep 23 – Oct 22), Scorpio (Oct 23 – Nov 21), Sagittarius (Nov 22 – Dec 21), Capricorn (Dec 22 – Jan 19), Aquarius (Jan 20 – Feb 18), Pisces (Feb 19 – Mar 20).
7. **Free Astrology Readings / मुफ्त ज्योतिष रीडिंग** — 12 square "painted" tiles (each its own gold/orange gradient with slowly spinning light rays, 60s) from `READINGS` (6 columns; 4 at ≤1100px; 3 at ≤560px).
8. **Learn & Grow / सीखें और आगे बढ़ें** (with ॐ) — 3 large cards:
 - Karmkand (🔥, saffron gradient): "Pooja Paddhati & Pooja Samagri" — "Step-by-step vidhi for 10 poojas with mantras and meanings, plus the significance of 57 samagri items." Chips: दैनिक पूजा, गणेश पूजन, रुद्राभिषेक, हवन. CTA "Start learning →" -> `/karmkand`.
 - Free course (🎓, night gradient): "Learn Astrology (Jyotish)" — "12 easy lessons from Navgrah and Rashis to Kundli reading, Dasha and Yogas — with quizzes and progress tracking." Chips: नवग्रह, बारह भाव, नक्षत्र, दशा. CTA "Begin lesson 1 →" -> `/jyotish-seechen`.
 - New · Mind & Career (🧠, teal gradient): "Manobal — Student & Life Guidance" — "12 chapters to handle stress, anxiety and low mood, plus a Kundli-based Career Compass and a private self-check." Chips: Breathing, Exam stress, Career. CTA "Begin your journey →" -> `/manobal`. (3 columns; 2 at ≤1100px; 1 at ≤860px.)
9. **Karmkand explainer** (`KarmkandSection`, see section 8 below).
10. **Manobal explainer** (`ManobalSection`, see section 9 below).
11. **Consult The Right Astrologer For You / अपने लिए सही ज्योतिषी चुनें** — 6 small cream tiles from `CONSULT_TOPICS`, each -> `/astrologers?focus={key}` (focus param is ignored by the astrologers page).
12. **Blogs / ब्लॉग** (anchor `#blogs`; its View All links back to `/#blogs` itself) — 3 blog teaser cards. The "Weekly Horoscope" card shows the current week's date range (Sunday to Saturday) computed from today; each card shows author initial, author, and a date computed as "today minus daysAgo". Big decorative glyphs: ✨ (weekly), 🌴 (palm), 🐘 (ganesha).
13. **Featured Videos / विशेष वीडियो** (anchor `#videos`) — 3 placeholder video cards (coloured thumbnails, "VedicDhaam" label, play button, duration). All link to `/astrologers`; no real video playback.
14. **Daily Horoscope Video / दैनिक राशिफल वीडियो** (View All -> `/horoscope`) — 3 cards for today, yesterday and the day before. Thumbnail: teal-to-purple background with "आज का राशिफल" in the Yatra One decorative font, the day number in a red circle with Hindi month/year, and a spinning ring of the 12 zodiac glyphs around "ॐ" (40s). Title: "{English date} आज का राशिफल | Aaj Ka Rashifal | मेष से मीन तक सभी 12 राशियाँ | Today's Horoscope" (mixed language regardless of setting). Links to `/horoscope`.
15. **Latest News / ताज़ा खबरें** (anchor `#news`) — 3 news cards (gradient art with ✨, title, source, date in DD/MM/YYYY computed from daysAgo, "Read Now" button -> `/#blogs`).
16. **Stats strip** (`StatsStrip`) — cream band (`#fff3d6`) with mandala background, 4 stats with round icons, revealed with 90ms stagger (4 columns; 2 at ≤1100px; 1 at ≤560px). Note: a code comment calls it a "count-up" but there is no number animation — values are static.
17. **Testimonials / ग्राहकों के अनुभव** — full-width light grey band (`#f6f4ef`) with two tilted yellow decorative pills. Carousel of 6 cards (★★★★★, quote, initial avatar in red circle, name, city). Cards per view: 1 under 720px wide, 2 under 1024px, 3 otherwise (recomputed on resize). Auto-advances every 7 seconds; dot buttons to jump.

18. **SEO content** (`SeoContent`, see below).

19. **Frequently Asked Questions / अक्सर पूछे जाने वाले प्रश्न** (`Faq`) — accordion of the 8 FAQs; one open at a time (plus/minus icon, smooth height animation via grid-rows; open item gets a saffron left border and bold text). All start closed.

components/home/HeroArt.js

- `HeroArt({ kind })`: 'wheel' -> ZodiacWheel inside `.heroWheel` (max 330px); 'diya' -> `DiyaArt`; anything else -> `LoveArt`.
- `LoveArt`: SVG constellation heart — 10 star points joined by a path that "draws" itself (3s stroke animation), twinkling stars (staggered 0.25s), a slowly spinning dashed circle, a beating red ♥ in the centre, a gold crescent moon top-right, and four floating zodiac glyphs (Aries, Libra, Leo, Pisces).
- `DiyaArt`: SVG clay diya (brown-orange gradient bowl) with a flickering flame (orange -> yellow -> pale), a pulsing glow, a slowly spinning 12-petal rangoli beneath (red, yellow, green, purple at 22% opacity), and 4 twinkling sparkle stars.

components/home/SeoContent.js (client)

- Holds two full content sets (`CONTENT.en` and `CONTENT.hi`) and renders the one for the current language.
- Structure: H2 "Free Online Astrology Prediction" (मुफ्त ऑनलाइन ज्योतिष भविष्यवाणी); two intro paragraphs (astrology as predictive science; India's gift of Vedic astrology; VedicDhaam offers Vedic, KP, Lal Kitab, numerology, tarot, Vastu); bold lead "Let's explore the two prominent branches..."; H3 "Indian Astrology (Vedic Astrology)" (27 Nakshatras, 9 Grahas, 12 Rashis, 12 Bhavas, Dashas, Yogas); H3 "Western Astrology" (tropical zodiac, Sun sign, transits/progressions; sidereal zodiac about 24° behind); H3 "Astrology Chart (Janam Kundli)" with 8 bullet points (planets in 12 houses; Moon/Venus/Mars; Jupiter for luck; Saturn for challenges; aspects (Drishti); balance of four elements; running Mahadasha/Antardasha; Yogas and Doshas such as Raj Yoga, Manglik Dosha, Kaal Sarp Dosha); closing paragraph about remedies with link "Generate your free Kundli →" -> `/birth-chart`.
- Styling: justified text (left-aligned on phones), saffron list markers.

8. KarmkandSection (components/home/KarmkandSection.js + karmkandSection.module.css)

- Client component. Data from `lib/karmkand/poojas.js` (`Poojas`, 10 poojas, 115 steps in total) and `lib/karmkand/samagri.js` (`SAMAGRI`, 57 items).
- The 10 poojas (icon, name, steps): 🙏 दैनिक पूजा (पंचोपचार विधि) 11; 🌸 षोडशोपचार पूजन 16; 🐘 श्री गणेश पूजन 10; 🌺 दीपावली लक्ष्मी पूजन 12; 🌺 श्री सत्यनारायण व्रत पूजा 10; 🙏 रुद्राभिषेक 10; 🌿 नवग्रह शांति पूजा 14; 🔥 हवन (यज्ञ) विधि 10; 🌺 कलश स्थापना एवं नवरात्रि पूजन 12; 🏠 गृह प्रवेश पूजा 10.
- **Left (intro)**: badge "🙏 Karmkand · in pure Hindi"; H2 "Learn to perform pooja **the right way, at home**" (Hindi: "घर पर स्वयं करें **विधिपूर्वक पूजा**"; the second part in a saffron-to-maroon gradient); lead paragraph explaining Karmkand as the Vedic science of rituals; two division cards:
 - 📖 Pooja Paddhati — "10 poojas · 115 steps with mantras & meanings" (counts computed live from data) -> `/karmkand/pooja-paddhati`
 - 🙏 Pooja Samagri — "57 items · meaning, use & precautions" -> `/karmkand/pooja-samagri` Buttons: "Explore Karmkand" -> `/karmkand`; "🙏 Start with daily pooja" -> `/karmkand/pooja-paddhati/dainik-pooja`.

- **Right (animated "Pooja Mode" phone preview, decorative/aria-hidden):** tilted device card showing "श्री गणेश पूजन" with a "Pooja Mode" pill and a progress bar; cycles every 4.2 seconds through the first 4 Ganesh Poojan steps that have mantras (पवित्रीकरण एवं आचमन; ध्यान एवं आवाहन; स्नान; वस्त्र, जनेऊ और सिंदूर), showing "Step n / 4", the step title and the first line of the mantra in the Tiro Devanagari Sanskrit font (maroon). Below: "Samagri ready" row of the first 6 samagri icons (first 4 with green check marks), and fake "< Back" / "Next step >" buttons. Under the device: shloka "पत्रं पुष्पं फलं तोयं यो मे भक्त्या प्रयच्छति।" with "— Offered with devotion, even a leaf is accepted (Gita 9.26)".
- **"How to use Karmkand — 4 simple steps"** (numbered with Devanagari numerals १ २ ३ ४):
 1. Choose a pooja -> </karmkand/pooja-paddhati>
 2. Gather the samagri (tick-off printable checklist with quantities) -> </karmkand/pooja-paddhati/dainik-pooja#samagri>
 3. Know why each item matters -> </karmkand/pooja-samagri>
 4. Perform with Pooja Mode (one step at a time, large text, mantra) -> </karmkand/pooja-paddhati/ganesh-poojan#vidhi>
- **"Popular pooja vidhis:"** chip links to all 10 poojas -> </karmkand/pooja-paddhati/{slug}> (name shown without the bracketed part).
- Styling: warm cream/peach gradient panel with red and saffron radial glows, mandala pattern, giant faint ॐ. Layout: 2 columns (1.25fr/1fr) -> 1 column ≤1000px; steps 4 -> 2 (≤1000px) -> 1 (≤560px).

9. ManobalSection (components/home/ManobalSection.js + manobalSection.module.css)

- Client component. Teal colour theme defined locally: `--teal #2a9d8f, --teal-soft #e6f4f1, --teal-deep #1d6f66`.
- **Left (intro):** badge "👤 New · Manobal"; H2 "Strengthen your mind, **clarify your path**" (Hindi "मन को सशक्त, राह को स्पष्ट करें"); lead: Manobal is a free guided programme for students and people of every age facing stress, anxiety, low mood, sleep problems or career confusion, blending proven psychology with Vedic astrology, in Hindi and English. Stat pills: "12 guided chapters", "7 daily practice tools", shield "free & 100% private". Buttons: "Start Manobal" -> </manobal>; "2-minute self-check" -> </manobal/self-check>.
- **Right (decorative "Today in Manobal" device preview):** "🔥 5-day streak" pill; breathing orb that grows/shrinks with text alternating "Breathe in..." / "Breathe out..." every 4 seconds; mood row of 5 emojis (😬 😞 😐 😊 😄, 😊 highlighted); task list (3 minutes of calm breathing; Log today's mood; Read Chapter 3 — Thoughts; Write 3 gratitudes) — first two start ticked; clicking a task toggles it (local state only, not saved); Career Compass mini card "Investigative · Social", "10th lord: Jupiter".
- **"How Manobal works — 4 simple steps"** (connected by a dashed teal line on desktop):
 1. Check in with yourself — 2-minute private self-check — "Start self-check" -> </manobal/self-check>
 2. Pick your chapter — 12 simple chapters — "See chapters" -> </manobal#chapters>
 3. Practise 10 minutes daily — breathing, thought journal, mood tracker, focus timer — "Open toolkit" -> </manobal#toolkit>
 4. Get career & life guidance — Career Compass combines interests with the Kundli's 10th house — "Find my direction" -> </manobal/career-compass>
- **Quick-start chips** "Or start with what you feel right now:": 📖 Exam stress -> </manobal/pariksha-ka-tanav>; 😰 Anxiety -> </manobal/chinta-se-mukti>; 🌧️ Feeling low -> </manobal/udasi-se-bahar>; 🌙 Poor sleep ->

/manobal/neend-aur-dinacharya; 🌐 Career confusion -> /manobal/career-compass; 🏠 Family conflict -> /manobal/sambandh-aur-samvad.

- **Safety note:** "Manobal supports wellbeing and is not a substitute for medical care. If you are in crisis, call Tele-MANAS 14416 (free, 24x7) or 112." — 14416 is a **tel:** link.
- Layout same pattern as Karmkand: 2 columns -> 1 at ≤1000px; steps 4 -> 2 -> 1.

10. Design system (app/globals.css + modules)

Colour tokens (:root)

Token	Value	Meaning
--bg	#ffdf8	page background (warm off-white)
--bg-soft	#fff7e3	soft cream
--bg-cream	#fbf3e0	cream tiles
--surface	#ffffff	cards
--border	#efe4c9	default border
--border-strong	#f2c14e	highlighted border
--text	#2a1a0b	main text (dark brown)
--text-muted	#6d5b45	secondary text
--text-dim	#a08d73	faint text
--saffron	#ffc21a	primary brand colour
--saffron-2	#ffd75e	light saffron
--saffron-deep	#e88a00	deep orange accent
--gold	#b88a3c	gold
--gold-soft	#c9a66b	soft gold
--maroon	#8b1e1e	maroon (mantras)
--vermilion	#ef4b3f	red (LIVE, errors)
--indigo	#1f0f3d	deep indigo
--green	#1e9e5a	green (CHAT/CALL, secure)

Gradients: **--grad-saffron** (135°, #ffd65a -> #ffc21a -> #f6a609), **--grad-sunset** (#ff9a3c -> #ef4b3f), **--grad-night** (160°, #2a1459 -> #140a2e), **--grad-gold-text** (#f0a500 -> #c26a00). Other accent colours used in modules: teal #2a9d8f / #1d6f66 (Manobal), red badge #ff7d6e, dark footer #2b2b2b, verified blue #2563eb.

Shape, shadow, layout tokens

- Radius: --radius-sm 10px, --radius 16px, --radius-lg 24px; buttons/pills fully rounded (999px).
- Shadows (warm brown tint): --shadow-sm 0 2px 8px rgba(120,80,10,.06), --shadow 0 10px 30px -12px rgba(120,80,10,.18), --shadow-lg 0 24px 60px -20px rgba(120,80,10,.3).
- --container 1280px (side padding 24px; 16px on ≤640px).

- `--header-h 128px` (72px on ≤ 1080 px when the nav row is hidden). `.page-top` adds header height + 48px top padding.
- `--ease cubic-bezier(0.22, 1, 0.36, 1)` used for almost all transitions.

Typography

- Body: Mukta (`--font-body`), 16.5px, line-height 1.65, fallback 'Noto Sans Devanagari', system-ui.
- Headings h1–h4: Poppins (`--font-display`), weight 700, line-height 1.2. h1 clamp(2.2rem, 5vw, 3.8rem); h2 clamp(1.6rem, 3vw, 2.4rem); h3 clamp(1.15rem, 1.6vw, 1.35rem).
- In Hindi mode (`html[data-lang='hi']`) headings get line-height 1.4 and no letter-spacing; eyebrow letter-spacing is reduced.
- `.glyph` class forces zodiac symbols to render as text symbols (Segoe UI Symbol / Noto Sans Symbols, `font-variant-emoji: text`).

Reusable global classes

- Layout: `.container`, `.section`, `.page-top`, `.grid`, `.text-center`, `.rail` (grid that turns into a horizontal swipe carousel with scroll-snap on ≤ 760 px, cards 82% wide).
- Text: `.gold-text` (gradient text), `.cosmic-text` (maroon), `.muted`, `.eyebrow` (uppercase saffron label framed by ✦ stars), `.section-head`, `.row-head` + `.view-all`.
- Decoration: `.mandala-bg` (repeating /mandala.svg watermark at 35% opacity, 180px tiles).
- Buttons: `.btn`, `.btn-primary` (saffron gradient with a shine sweep on hover and lift), `.btn-ghost` (white with border), `.btn-dark`, sizes `.btn-sm` / `.btn-lg`, `.btn-block`.
- Cards: `.card`, `.card-hover`, `.card-glow`, `.pill`, `.divider`, `.badge-live` (red pill with blinking white dot).
- Forms: `.field`, `.input` (saffron focus ring), `.input.invalid`, styled `select.input` with a custom arrow, `textarea.input`, `.error-text`.
- Tabs: `.tabs`, `.tab` (selected tab uses saffron gradient via `aria-selected`).
- `.meter` progress bars (animated grow).
- Accessibility: `.sr-only`; `:focus-visible` saffron outline; custom saffron scrollbar; selection colour saffron.

Animations (keyframes)

- Global: `grow` (scaleX bar), `fadeUp` (fade + rise 22px), `float` (bob 12px), `spin` (360°), `blink`, `pulseGlow` (opacity + scale 1.06).
- Classes: `.fade-up` (0.8s on load), `.reveal` / `.is-visible` (scroll reveal via Reveal component).
- Home module: `twinkle`, `draw` (SVG path drawing), `beat` (heartbeat), `flicker` (diya flame); plus slow spins on rangoli, rays, logo, zodiac wheels.
- SignInModal: `fade` backdrop.
- Timers: hero slides 6.5s; testimonials 7s; Karmkand preview 4.2s; Manobal breathing 4s.
- `prefers-reduced-motion: reduce` disables nearly all animations/transitions and shows `.reveal` content immediately.

Breakpoints used

- 1240px (nav tightens), 1100px (home grids shrink), 1080px (desktop nav -> burger; header height 72px), 1000px (footer 2 cols; Karmkand/Manobal stack), 1024px & 720px (testimonial cards per view, JS), 860px (hero stacks vertically, art on top; quick actions 2 cols; learn cards 1 col), 760px (rails become swipe

carousels), 640px (container padding 16px), 560px (phone layout: many grids 3 or 1 column, hide Sign-In/lang in top bar), 400px (logo tagline hidden).

11. public/ assets

- `public/icon.svg` — favicon (64×64): dark brown rounded square `#2a1a0b`, gold gradient circle (`#ffd65a` -> `#e88a00`), "ॐ" in the middle.
- `public/mandala.svg` — 180×180 line-art mandala (stroke `#e7cf98`, 0.8px): two circles (one dashed), 8 petals with dots, a central 4-point star, and corner brackets. Used as a repeating watermark (`.mandala-bg`), in hero slides, the sign-in modal, learn cards, and the Karmkand/Manobal sections.
- No photos or raster images are used anywhere; all imagery is CSS gradients, inline SVG, emoji and Unicode glyphs.

12. Notable limitations (core / home)

1. **No backend at all.** No API routes, database, authentication, payments or email service are present in these files.
2. **Sign-in is simulated** (stated in code): any valid-looking Indian mobile number plus any 4 digits "signs you in"; no SMS, no session, header does not change, nothing is stored.
3. **Newsletter form does not submit anywhere** — it only validates the email format and shows a success message.
4. **Notifications are static** sample messages; the red dot is always on.
5. **Social media icons and app-store badges are dead** (`href="#"` with `preventDefault`; store badges are not links).
6. **Placeholder content:** blogs, videos, news, stats ("5,000+ astrologers", "4 Crore+ customers", "85+ countries"), testimonials and live sessions are hard-coded samples. Videos do not play; "WATCH NOW" and video cards only open `/astrologers`. Blog/news "dates" are computed relative to today so they always look recent.
7. **Missing pages:** About, Careers, Refund Policy, Privacy Policy, T&C, Astrologer Registration, Partner With Us all link to `/contact`. Footer "FAQs" links to `/#blogs` instead of the FAQ section. Blogs "View All" links to itself.
8. **?focus= filter links** (Footer Quick Links and "Consult The Right Astrologer" tiles) are not read by the astrologers page, so no filtering happens.
9. **"Follow" button** on live cards and **task ticks** in the Manobal preview are local state only and reset on reload.
10. **Language flash:** server HTML is always English; Hindi preference is applied after the page loads on the client. No separate Hindi URLs for search engines.
11. "Daily Horoscope Video" titles mix English and Hindi regardless of the chosen language; the Karmkand section's pooja names and Pooja Mode preview content are Hindi-only (from the Hindi-only karmkand data files).
12. README is a stale one-line placeholder ("# vediccourse", UTF-16 encoded) with no setup instructions.
13. Astrologer "rating" badge actually shows the expert number (01, 02...); there are no real ratings, prices or photos.

Astrology Tools & Calculations

ज्योतिष टूल्स एवं गणनाएँ

0. Things that apply to every page

- **Page structure.** Each route has a server `page.js` that exports static `metadata` and renders a `PageHeader` banner plus a client component (`'use client'`).
- **Titles.** The root layout (`app/layout.js`) sets the title template `'%s · VedicDhaam'`. So the browser title is " · VedicDhaam".
- **PageHeader banner.** It shows a breadcrumb (Home › crumb), an "eyebrow" label, an H1 (title + highlighted gold word), a lead paragraph and a decorative ॐ. Every text value is a bilingual `{en, hi}` object rendered with `t()` from `useLang()` (`lib/i18n`).
- **Where calculations run.** All of them run in the browser, in JavaScript. There is no API, no database and no server-side calculation for any tool.
- **Rendering.**
 - Every listed route is a static page whose interactive parts are client-rendered.
 - `/zodiac/[sign]` is the only dynamic route. It is pre-rendered for the 12 slugs through `generateStaticParams`, so it is effectively SSG.
 - `/compatibility`, `/contact` and `/horoscope` wrap their client in `<Suspense fallback={null}>` because they read URL query parameters (`useSearchParams`).
- **Shared data.**
 - Zodiac sign data comes from `lib/zodiac.js`.
 - Cities come from `lib/panchang.js` (`CITIES`).
 - The astronomy core is `lib/astro.js`.

1. LIBRARIES

1.1 lib/zodiac.js: reference data for the 12 signs

- **ELEMENTS** maps each element to a colour and a description:
 - Fire: `#ff8a5c`, "Passionate, dynamic and bold"
 - Earth: `#9bd17a`, "Grounded, practical and patient"
 - Air: `#8ec5ff`, "Intellectual, social and curious"
 - Water: `#b99bff`, "Intuitive, emotional and deep"
- **SIGNS** is an array of 12, in Aries→Pisces order. That order is also used as the zodiac order for converting a longitude to a sign. Fields per sign:
 - `slug`, `name`, `glyph` (Unicode symbol + U+FE0E so it renders as text, not emoji)
 - `dates` (Western/tropical date range), `start` [month, day]

- `element`, `modality`, `ruler`, `symbol`
- `luckyNumber`, `luckyColor`
- `traits` (4 words), `strengths`, `weaknesses`, `summary`

Sign	Dates	Element	Modality	Ruler	Symbol	Lucky no.	Lucky colour
Aries	Mar 21–Apr 19	Fire	Cardinal	Mars	The Ram	9	Scarlet
Taurus	Apr 20–May 20	Earth	Fixed	Venus	The Bull	6	Emerald
Gemini	May 21–Jun 20	Air	Mutable	Mercury	The Twins	5	Yellow
Cancer	Jun 21–Jul 22	Water	Cardinal	Moon	The Crab	2	Silver
Leo	Jul 23–Aug 22	Fire	Fixed	Sun	The Lion	1	Gold
Virgo	Aug 23–Sep 22	Earth	Mutable	Mercury	The Maiden	5	Navy
Libra	Sep 23–Oct 22	Air	Cardinal	Venus	The Scales	7	Rose
Scorpio	Oct 23–Nov 21	Water	Fixed	Pluto	The Scorpion	8	Crimson
Sagittarius	Nov 22–Dec 21	Fire	Mutable	Jupiter	The Archer	3	Purple
Capricorn	Dec 22–Jan 19	Earth	Cardinal	Saturn	The Sea-Goat	4	Charcoal
Aquarius	Jan 20–Feb 18	Air	Fixed	Uranus	The Water-Bearer	11	Electric Blue
Pisces	Feb 19–Mar 20	Water	Mutable	Neptune	The Fish	12	Sea Green

Traits per sign (English):

- Aries: Courageous, Energetic, Pioneering, Impulsive
- Taurus: Reliable, Sensual, Patient, Stubborn
- Gemini: Curious, Witty, Adaptable, Restless
- Cancer: Nurturing, Intuitive, Loyal, Sensitive
- Leo: Radiant, Generous, Creative, Proud
- Virgo: Analytical, Kind, Diligent, Perfectionist
- Libra: Diplomatic, Charming, Fair, Indecisive
- Scorpio: Passionate, Magnetic, Resourceful, Secretive
- Sagittarius: Adventurous, Optimistic, Honest, Restless
- Capricorn: Ambitious, Disciplined, Wise, Reserved
- Aquarius: Visionary, Independent, Humanitarian, Aloof
- Pisces: Compassionate, Artistic, Dreamy, Escapist

Things to note about this data:

- The dates and rulers are Western (tropical) astrology. Scorpio, Aquarius and Pisces use the modern rulers Pluto, Uranus and Neptune, not the Vedic lords (Mars, Saturn, Jupiter).
- The same `SIGNS` objects double as Vedic rashis in the kundli and panchang code, where they are used only for their name, glyph and order.

Functions:

- `getSign(slug)` looks up a sign by slug.
- `sunSignFor(month, day)` returns the Western sun sign from a date by walking the sorted start dates, with Capricorn wrapping over the new year. No page in this scope calls it.

- `localizeSign(sign, lang)` returns the sign with display fields:
 - It adds `elementLabel`, `modalityLabel`, `rulerLabel` and `englishName`.
 - For `hi` it overlays the Hindi `HI[slug]` values: name (मेष, वृषभ, मिथुन, कर्क, सिंह, कन्या, तुला, वृश्चिक, धनु, मकर, कुंभ, मीन), symbol, luckyColor, traits, strengths, weaknesses and summary.
 - It translates month abbreviations in the dates (`MONTHS_HI`).
 - It maps element/modality/planet names to Hindi (`ELEMENT_HI` अग्नि/पृथ्वी/वायु/जल; `MODALITY_HI` चर/स्थिर/द्विस्वभाव; `PLANET_HI`).
- `signNameHi(slug)` returns the Hindi name. It is used in the zodiac metadata.

1.2 lib/astro.js: astronomy core (positions are tropical)

- **Time base.** Days since J2000.0 = `ms/86400000 + 2440587.5 - 2451545.0`.
- `sunLongitude(utc)`. This is the standard low-precision solar formula (the one in the Astronomical Almanac):
 - $L = 280.46 + 0.9856474 \cdot d$
 - $g = 357.528 + 0.9856003 \cdot d$
 - $\text{longitude} = L + 1.915 \cdot \sin g + 0.02 \cdot \sin 2g$
 - The code comment claims about 0.01° accuracy.
- `moonLongitude(utc)`. Mean longitude plus 6 periodic terms, a simplified version of Meeus: $6.289 \sin M$, $1.274 \sin(2D - M)$, $0.658 \sin 2D$, $0.214 \sin 2M$, $-0.186 \sin M \odot$, $-0.114 \sin 2F$. The code comment says about 1° accuracy.
- `signFromLongitude(lon)` = `SIGNS[floor(lon/30)]`.
- `moonPhase(sunLon, moonLon)`. It takes the angle (Moon – Sun) and picks one of 8 phases, each 45° wide, centred on 0/45/90...:
 - The phases are New Moon, Waxing Crescent, First Quarter, Waxing Gibbous, Full Moon, Waning Gibbous, Last Quarter, Waning Crescent.
 - Each phase has an emoji icon and a bilingual personality "meaning". For example, New Moon is "A natural initiator, driven by instinct and fresh beginnings."
- **Planets (Mars, Mercury, Jupiter, Venus, Saturn).**
 - It uses the JPL "Approximate Positions of the Planets" Keplerian elements (valid 1800–2050), with per-century rates.
 - It solves Kepler's equation with 8 Newton iterations and computes heliocentric ecliptic x/y for the planet and for Earth.
 - Geocentric longitude = atan2 of the difference.
 - Only longitude is computed. Latitude, light-time and aberration are ignored.
- `grahaLongitudes(utc)` returns tropical longitudes for the 9 grahas:
 - Sun and Moon come from the formulas above, and are never retrograde.
 - For the 5 planets, retrograde = the geocentric longitude 24 hours later is smaller, i.e. the planet moved backwards.
 - Rahu = the **mean** lunar node, $125.04452 - 0.0529538083 \cdot d$. It is not the true node. Ketu = Rahu + 180° . Both are flagged retrograde.
- `ascendant(utc, lat, lon)`.
 - $\text{GMST} = 280.46061837 + 360.98564736629 \cdot d$, and $\text{RAMC} = \text{GMST} + \text{east longitude}$.

- Obliquity = $23.4393 - 0.0000004 \cdot d$.
- Asc = $\text{atan2}(\cos \text{RAMC}, -(\sin \text{RAMC} \cdot \cos \varepsilon + \tan \varphi \cdot \sin \varepsilon))$, the standard ascendant formula.
- The result is tropical, with no nutation correction.

1.3 lib/panchang.js: ayanamsa, nakshatra and the daily Panchang

- **ayanamsa(date)** = $23.853^\circ + \text{years since J2000} \times 0.013969^\circ/\text{yr}$ (about $50.3''/\text{yr}$). This is a linear Lahiri approximation; the comment says it is good to a few arc-minutes for 1900–2100.
- **sidereal(tropLon, date)** = tropical – ayanamsa, normalised to 0–360.
- **NAKSHATRAS** : 27 bilingual names, Ashwini ... Revati.
- **nakshatraOf(lon)** : index = $\text{floor}(\text{lon} / 13^\circ 20')$, pada = which quarter ($3^\circ 20'$) of that nakshatra, 1–4.
- **TITHIS** : 14 names, Pratipada...Chaturdashi. Index 14 is Purnima and 29 is Amavasya.
- **YOGAS** : 27 names, Vishkambha ... Vaidhriti.
- **Karanas**.
 - 7 movable ones: Bava, Balava, Kaulava, Taitila, Gara, Vanija, Vishti (Bhadra).
 - 4 fixed ones: Kimstughna, Shakuni, Chatushpada, Naga.
- **VAARA** : Sunday (Ravivar) ... Saturday (Shanivar), plus Hindi.
- **sunTimes(y, m, d, lat, lon, tz)** uses the NOAA approximation:
 - Fractional-year Fourier series for the equation of time and the solar declination.
 - Hour angle for zenith 90.833° (refraction plus the solar disc).
 - Sunrise = $720 - 4(\text{lon} + \text{ha}) - \text{eqtime} + \text{tz} \cdot 60$ minutes after local midnight. Sunset uses $(\text{lon} - \text{ha})$. Solar noon = $720 - 4 \cdot \text{lon} - \text{eqtime} + \text{tz} \cdot 60$.
 - Altitude above sea level is ignored. The cos value is clamped, so polar day or night does not crash but gives a degenerate result.
- **fmtMinutes** formats minutes as "h:mm AM/PM", wrapping at 24 h.
- **getPanchang(dateStr, {lat, lon, tz})**:
 - All five limbs are computed **at the moment of local sunrise**, which is the traditional approach.
 - Weekday comes from the calendar date.
 - **Tithi**.
 - diff = (Moon – Sun) tropical, 0–360. The ayanamsa cancels out, so sidereal and tropical give the same answer.
 - Tithi index = $\text{floor}(\text{diff}/12^\circ)$, 0–29. Indices 0–14 are Shukla Paksha and 15–29 are Krishna Paksha.
 - Names: index 14 is Purnima, 29 is Amavasya, otherwise **TITHIS[index % 15]**. The number shown is $(\text{index} \% 15) + 1$.
 - progress = $(\text{diff} \bmod 12)/12$, the fraction of the tithi already elapsed at sunrise.
 - **Nakshatra**. From the sidereal Moon, with pada.
 - **Yoga**. $\text{floor}((\text{sidereal Sun} + \text{sidereal Moon}) \bmod 360 / 13^\circ 20')$, giving one of the 27 yogas.
 - **Karana**. half = $\text{floor}(\text{diff}/6^\circ)$, 0–59.
 - 0 is Kimstughna; 57, 58 and 59 are Shakuni, Chatushpada and Naga.
 - Otherwise it is the movable karana **(half-1) % 7**, which cycles 8 times.
 - This is the correct traditional scheme.
 - **Moon sign / Sun sign** are sidereal rashis.

- **Ayanamsa** is the value at sunrise.
- **Rahu Kaal, Yamaganda and Gulika.** Daytime (sunrise→sunset) is cut into 8 equal parts, and the part used depends on the weekday. These tables match the standard ones:

Day	Rahu Kaal part	Yamaganda part	Gulika part
Sun	8th	5th	7th
Mon	2nd	4th	6th
Tue	7th	3rd	5th
Wed	5th	2nd	4th
Thu	6th	1st	3rd
Fri	4th	7th	2nd
Sat	3rd	6th	1st

- **Abhijit Muhurat.** One muhurta (day length / 15), centred on local solar noon.
- **Choghadiya.**
 - Day: sunrise→sunset in 8 equal slots. Night: sunset→next day's sunrise in 8 equal slots.
 - Slot names follow the fixed 7-name cycles. Day: Udveg, Chal, Labh, Amrit, Kaal, Shubh, Rog. Night: Shubh, Amrit, Chal, Rog, Kaal, Labh, Udveg.
 - The starting name depends on the weekday:
 - Day starts (Sun→Sat): Udveg, Amrit, Rog, Labh, Shubh, Chal, Kaal.
 - Night starts (Sun→Sat): Shubh, Chal, Kaal, Udveg, Amrit, Rog, Labh.
 - Tone: good = Labh, Amrit, Shubh; neutral = Chal; bad = Udveg, Kaal, Rog.
- **What it does not provide:**
 - No end times are calculated for tithi, nakshatra, yoga or karana. Only the value at sunrise is shown.
 - No lunar month (maas) or samvat.
 - No moonrise.
- **CITIES:** 16 fixed locations with lat, lon and a fixed UTC offset:
 - New Delhi, Mumbai, Kolkata, Chennai, Bengaluru, Hyderabad, Ahmedabad, Pune, Jaipur, Lucknow, Varanasi, Ujjain, Patna: all +5.5
 - Kathmandu +5.75, Dubai +4, London (GMT) 0
 - Daylight saving is not handled. London is always GMT.

1.4 lib/kundli.js: Vedic birth chart

- **GRAHAS:** 9 grahas with bilingual name and abbreviation: Sun Su/सू, Moon Mo/चं, Mars Ma/मं, Mercury Me/बु, Jupiter Ju/गु, Venus Ve/शु, Saturn Sa/श, Rahu Ra/रा, Ketu Ke/के.
- **buildKundli({date, time, lat, lon, tz}):**
 1. Local date/time (time defaults to 12:00 if empty) is converted to UTC by subtracting tz hours.
 2. Tropical graha longitudes come from `grahaLongitudes`.
 3. **Lagna** = the tropical ascendant converted to sidereal with the Lahiri ayanamsa. Lagna sign = $\text{floor}(\text{lon}/30)$.
 4. For each graha:

- sidereal longitude, sign, degree within the sign, nakshatra and pada
- **house** = **whole-sign house** counted from the lagna sign: $(\text{signIdx} - \text{lagnaSign} + 12) \% 12 + 1$
- retrograde flag (always hidden for Rahu and Ketu)

5. **Rashi** = the Moon's sidereal sign. **Nakshatra** = the Moon's nakshatra.

6. **westernSun** = the tropical Sun sign.

7. **phase** = birth Moon phase, from tropical Sun and Moon.

8. **Manglik** = true if Mars is in house 1, 2, 4, 7, 8 or 12 counted **from the Lagna only**. There is no check from the Moon or Venus and no cancellation rules.

9. **Vimshottari Mahadasha**:

- Order and years: Ketu 7, Venus 20, Sun 6, Moon 10, Mars 7, Rahu 18, Jupiter 16, Saturn 19, Mercury 17 (total 120).
- The starting lord = Moon's nakshatra index mod 9.
- The fraction of the nakshatra already traversed is used to back-date the true start of the first dasha. The first period's displayed start is clamped to the birth date.
- 9 consecutive periods are listed, using 365.25-day years.
- **currentDasha** = the period containing "now". Only Mahadashas are computed; there are no antardashas.

• **Spot check.** Run locally for 15 Jan 1990, 10:30 IST, New Delhi:

- Results: Sun 1° Capricorn, Moon Leo (Purva Phalguni), Saturn 23° Sagittarius, Jupiter Gemini (retrograde), Venus Capricorn (retrograde), Mercury Sagittarius (retrograde), Lagna Pisces 1°.
- These match real ephemeris facts for that date (Venus, Mercury and Jupiter really were retrograde).
- So the results are broadly correct at sign level. Accuracy is an approximation: Moon about 1°, mean node, no nutation.

1.5 lib/compatibility.js: sign-pair compatibility (not real Guna Milan)

`getCompatibility(slugA, slugB)` uses **only the two zodiac signs**:

1. **Base score from the element pair:**

- Fire–Fire 82, Fire–Air 90, Fire–Earth 55, Fire–Water 48
- Earth–Earth 80, Earth–Water 88, Earth–Air 50
- Air–Air 78, Air–Water 52
- Water–Water 84

2. **Aspect bonus.** distance = number of signs apart, folded to 0–6. Bonuses:

Signs apart	Name	Bonus
0	same sign	+2
1		−4
2	sextile	+6
3	square	−8
4	trine	+8
5		−6
6	opposition	+4

3. **Modality bonus:** same modality −2, different +3.
4. **overall** = base + aspect + modality, clamped to 30–98%.
5. **Four category bars:** Love & Romance, Friendship, Communication, Trust.
 - Each = overall + a deterministic pseudo-offset made from the two sign indices. Example for Love: $((iA \cdot 7 + iB \cdot 3) \bmod 15) - 6$.
 - Each is clamped to 25–99.
 - The offsets are arbitrary arithmetic, not astrology.
6. **verdict** depends on overall:

overall	Verdict
≥ 85	"Written in the Stars"
≥ 72	"Harmonious Match"
≥ 60	"Promising Potential"
otherwise	"Challenging Chemistry"

Each verdict has a bilingual explanation sentence.

7. **gunas** = $\text{round}(\text{overall}/100 \times 36)$. The code calls this a "rough Ashtakoot-style guna figure".
 - Because overall is clamped to 30–98, the gunas shown can only be 11–35.
 - **No actual Ashtakoot koota** (Varna, Vashya, Tara, Yoni, Graha Maitri, Gana, Bhakoot, Nadi) **is computed**.
 - Results are symmetric for the element and aspect parts, but the category offsets depend on order, so $A \rightarrow B$ and $B \rightarrow A$ can differ.
- **Example:** Leo + Libra = 98% overall, 35/36, "Written in the Stars", categories 93/99/93/99.

1.6 lib/horoscope.js: daily/weekly/monthly readings (template text, not astronomy)

- **Not random per visit.** The output is pseudo-random but deterministic:
 - Seed string = `"<slug>:<period>:<periodKey>"`, hashed with FNV-1a 32-bit.
 - The hash feeds a Mulberry32 PRNG.
 - Every visitor therefore sees the same reading for a given sign + period + date. The date is the visitor's local browser date (`useToday`).
- **periodKey:**
 - daily = `Y-M-D`
 - weekly = `Y-w<weekNo>`, where `week = ceil((days since Jan 1 + weekday of Jan 1 + 1)/7)`
 - monthly = `Y-M`
- **Text** = 1 opener (10 options) + 1 middle (10) + 1 closer (8), concatenated. That gives 800 possible main paragraphs. Example opener: "Mercury sharpens your words and your wit."
- **Love / Career / Health:** one sentence each, from 6 options apiece.
- **Scores** (love, career, health, luck): each 55–99%.
- **Mood:** 8 options (Inspired, Serene, Adventurous, Romantic, Focused, Playful, Reflective, Confident).
- **Lucky colour:** 9 options (Gold, Lavender, Teal, Coral, Saffron, Rose, Emerald, Silver, Amber).
- **Lucky number:** 1–99.
- **Lucky time:** 8 fixed options (7:00 AM ... 9:10 PM).

- **"Best match"**: a random other sign, unrelated to the compatibility scores.
- The text pools are the same for all signs. Planet positions are never consulted. All text is bilingual.

1.7 lib/numerology.js

- **Master numbers**: 11, 22 and 33. They are not reduced further.
- **reduce(n)**: repeatedly sums the digits until $n \leq 9$ or n is a master number.
- **Letter values (Pythagorean)**: A=1 ... I=9, J=1 ... R=9, S=1 ... Z=8, i.e. $((\text{code} - 'a') \bmod 9) + 1$. Only a–z count; everything else is stripped.
- **lifePath(date)** (Bhagyank) = $\text{reduce}(\text{reduce}(\text{year}) + \text{reduce}(\text{month}) + \text{reduce}(\text{day}))$.
 - Each component is reduced first, keeping masters. For example, day 22 stays 22.
- **mulank(date)** = the birth day reduced to a single digit. Masters are not kept: $22 \rightarrow 4$, $29 \rightarrow 11 \rightarrow 2$.
- **expression(name)** (Name Number) = $\text{reduce}(\text{sum of all letter values})$.
- **soulUrge(name)** = the same over vowels only (a, e, i, o, u; y is not a vowel).
- **personality(name)** = the same over consonants only. It returns null if there are no matching letters.
- **MEANINGS** for 1–9, 11, 22 and 33. Each has a bilingual title, 3 keywords and a text. Titles:

Number	Title
1	The Leader
2	The Peacemaker
3	The Creator
4	The Builder
5	The Adventurer
6	The Nurturer
7	The Seeker
8	The Powerhouse
9	The Humanitarian
11	The Intuitive (Master)
22	The Master Builder
33	The Master Teacher

- The Hindi texts for 1–9 add the ruling planet, which the English texts do not: 1 Sun, 2 Moon, 3 Jupiter, 4 Rahu, 5 Mercury, 6 Venus, 7 Ketu, 8 Saturn, 9 Mars.
- **Example**: "Priya Sharma", 1990-01-15 gives Mulank 6, Bhagyank 8, Name 3, Soul Urge 3, Personality 9.

1.8 lib/tarot.js

- **MAJOR_ARCANA**: **22 cards only** (0 The Fool ... XXI The World). There are no Minor Arcana. Each card has:
 - a Roman numeral
 - a Unicode icon
 - a bilingual name (e.g. "द फूल (मूर्ख)")
 - a bilingual upright meaning and a bilingual reversed meaning

- **SPREAD_POSITIONS**: Past ("What has shaped you"), Present ("Where you stand now"), Future ("What is unfolding").
- **drawCards(3)**:
 - Copies the deck, does a Fisher–Yates shuffle with `Math.random()`, and takes the first 3.
 - Each card is independently reversed with 30% probability.
 - This is truly random, not seeded or reproducible, and does not depend on the question.

1.9 lib/astrologers.js

- **SKILLS** (8): Counselling, Palmistry (हस्तरेखा), Tantra Vigyan, Shastra, Jyotish, Karmkand, Prashna Jyotish, Vastu.
- **PANEL_INTRO**: a bilingual intro paragraph.
- **ASTROLOGERS** (8 experts). Each has an id, bilingual name, title and bio, a skills array, and a hue for the avatar colour:

#	Name (Hindi)	Title	Skills
1	Ashish Kumar Ji (आशीष कुमार जी)	Counselling & Guidance Expert	counseling
2	Puneet Sharma Ji (पुनीत शर्मा जी)	Palmistry Expert	palm
3	Pankaj Kumar Ji (पंकज कुमार जी)	Tantra Vigyan Expert	tantra
4	Dr. Umesh Kumar (डॉ. उमेश कुमार)	Shastra Expert	shastra
5	Dr. Dinesh Shastri (डॉ. दिनेश शास्त्री)	Jyotish Expert	jyotish
6	Acharya Nishant Sharma Ji (आचार्य निशांत शर्मा जी)	Jyotish & Karmkand Expert	jyotish, karmkand
7	Dr. Tushar Sharma (डॉ. तुषार शर्मा)	Prashna Jyotish & Vastu Expert	prashna, vastu
8	Dr. Tarun Shastri (डॉ. तरुण शास्त्री)	Jyotish Alankar & Shastra Expert	jyotish, shastra

- **LIVE_SESSIONS** (5, used on the home page): "What does your planet say?" (expert 5), "Vastu for a happy home" (7), "What do your palm lines say?" (2), "Pitru Paksha remedies" (6), "Finding clarity in tough times" (1).
- **Helpers**:
 - `getAstrologer(id)`
 - `expertNo` (zero-padded "01")
 - `initials(name)`: strips Acharya/Pandit/Dr. and a trailing " Ji", then takes the first 2 initials, e.g. "AK".
- There are no photos, ratings, prices, availability or languages for experts. The avatar is coloured initials.

2. PAGES

2.1 /astrologers: Our Panel of Experts (static)

- **Metadata title**: "Our Panel of Experts · हमारे विशेषज्ञ मंडल". Description: "Experienced guides in Jyotish, Shastra, Karmkand, Vastu, Tantra Vigyan, Palmistry and Counselling."
- **Header**: "Our Panel of **Experts**" / "हमारे विशेषज्ञ मंडल", crumb "Experts".
- **What the user sees**:

- The intro paragraph (`PANEL_INTRO`).
- A row of expertise tab buttons: "All" plus the 8 skills. Clicking one filters to experts that have that skill.
- A search input, "Search by name...". It matches the English name case-insensitively or a substring of the Hindi name.
- A count line: "N experts found".
- A grid of `AstrologerCard` s. Each card shows:
 - the initials avatar, the expert number badge (01–08), the name with a verified-check icon, a star icon + title, and the bio
 - the skill names joined by " · "
 - two buttons, **CHAT** and **CALL**. They link to `/contact?astro=<id>&mode=chat` or `&mode=call` , which pre-selects the expert and mode on the booking page.
- If nothing matches: a 📡 empty state with a "Clear filters" button, which resets the search and the skill filter.
- **Limitations:**
 - All filtering is client-side over 8 hard-coded entries.
 - The `?focus=marriage` link from the compatibility page is ignored by this page.

2.2 /birth-chart: Free Janam Kundli (static page, client calculation)

- **Metadata title:** "Free Janam Kundli · मुफ्त जन्म कुंडली". Description: "Free Vedic birth chart: Lagna, Rashi, Nakshatra, planetary positions, Vimshottari Dasha and Manglik check."
- **Header:** "Free Janam **Kundli**", crumb "Free Kundli".

Form fields:

1. **Full name.** Required; only used as the heading of the result.
2. **Date of birth** (date picker). Required. It cannot be in the future, and the year must be 1900–2050 (this matches the range where the JPL planet data is valid).
3. **Time of birth** (time picker). Defaults to 06:00 and is not validated.
4. **Place of birth** (dropdown). The 16 `CITIES` (default New Delhi) plus "Other (enter coordinates)". Choosing Other shows three more fields:
 - Latitude (N +): must satisfy $|lat| \leq 66$.
 - Longitude (E +): must satisfy $|lon| \leq 180$.
 - UTC offset (hours): default 5.5; anything that does not parse becomes 0.

Other form behaviour:

- A hint says Rashi and Nakshatra stay accurate without the exact time but the Lagna needs it. In fact the Moon moves about 13° a day, so the time still matters near boundaries.
- Errors show bilingually under each field.

Button: "🔮 Generate Free Kundli".

- On submit it validates, then shows a spinner with "Calculating planetary positions..." for an artificial 700 ms delay.
- It then calls `buildKundli` and smooth-scrolls to the result.

Output:

- **Summary.** The name, the formatted date · time · place, and 4 key facts with glyphs:

- Lagna (Ascendant) sign
- Rashi (Moon sign)
- Nakshatra (with Pada)
- Sun sign (Western, tropical)
- **Lagna Chart (D1).** A North-Indian diamond chart drawn as inline SVG (400×400):
 - House 1 is the top centre diamond, which is highlighted and labelled "Asc".
 - Each house shows its rashi number, computed as $(\text{lagnaldx} + \text{house} - 1) \% 12 + 1$.
 - The planet abbreviations are placed in their whole-sign house, up to 3 per line, with "*" for retrograde.
 - Note: "North Indian style · Numbers show the rashi in each house · * retrograde".
- **Planetary Positions table.**
 - Columns: Graha | Rashi | Degree (d° mm') | Nakshatra (pada) | House.
 - The first row is the Lagna, then the 9 grahas. Retrograde grahas get an "R"/"ꣳ" tag.
 - Footer: "Sidereal zodiac, Lahiri ayanamsa xx.xx°".
- **Vimshottari Mahadasha.** 9 lords with start–end years. The running one is highlighted with "Running".
- **Manglik Dosha card.** Shows "Manglik" or "Not Manglik" and "Mars is in house N from the Lagna."
 - If Manglik: advice to consult an astrologer before marriage.
 - Otherwise: "No Mangal Dosha from the Lagna."
- **Birth Moon & Numbers card.**
 - The birth Moon phase icon, name and meaning.
 - Mulank and Bhagyank, both linking to /numerology, and the Bhagyank meaning title.
- **CTA:** "Get your Kundli read by an expert ... First consultation FREE." with a button "Talk to Astrologer" that goes to /astrologers.

Accuracy and limitations:

- The calculation is real astronomy but simplified (Sun ~0.01°, Moon ~1°, low-precision planets, mean Rahu, linear Lahiri ayanamsa, no nutation). It is good for sign-level placements. Degrees may be off by up to about 1° for the Moon and less for the others.
- Houses are whole-sign.
- No divisional charts beyond D1 and no antardasha.
- Only 16 cities, or manual coordinates. No geocoding and no daylight-saving handling.
- Nothing is saved. There is no PDF download.

2.3 /compatibility: Love Compatibility (static page, query parameters)

- **Metadata title:** "Love Compatibility & Kundli Matching · कुंडली मिलान". Description: "Discover how compatible two zodiac signs are in love, friendship, communication and trust."
- **Header:** "Love **Compatibility**", crumb "Compatibility" / "कुंडली मिलान".
- **Inputs:**
 - Two sign dropdowns: "Your sign" (default Leo) and "Partner's sign" (default Libra). Each shows the sign glyph, the localized name, and the element label in the element colour plus the date range.
 - URL parameters `?a=<slug>&b=<slug>` preset the signs. If both are present, the result is revealed automatically on load (this is how the shared links from the horoscope and sign pages work). Invalid slugs fall back to the defaults.

- **Buttons:**
 - ♥ **swap**. Swaps the two signs and clears the result.
 - "♦ **Reveal Compatibility**". Computes `getCompatibility(a, b)` and scrolls to the result.
 - Changing either dropdown also clears the result.
- **Output:**
 - An animated circular score ring that counts up to overall% over 1.4 s.
 - The pair names with glyphs, the verdict title and text.
 - "**NN/36** Guna Milan (sign-based estimate)".
 - 4 category meters with percentages.
 - A note: "For complete Ashtakoot Kundli matching with birth details, consult a marriage astrologer". The link goes to `/astrologers?focus=marriage`, and the astrologers page ignores that parameter.
- **How it is calculated:** see 1.5. It is element/aspect/modality arithmetic on sun signs, not real Guna Milan. The 36-point figure is just the percentage rescaled.

2.4 /contact: Book a Consultation (static; NO BACKEND)

- **Metadata title:** "Book a Consultation · परामर्श बुक करें". Description: "Book a private astrology consultation by chat, call or video with an expert astrologer."
- **Header:** "Book a **Consultation**", crumb "Book a Reading".
- **Plan cards** (a radio group; clicking one selects it, default "Complete Kundli"):

Plan	Price	Length	Features
Essential	₹499	20 min	Lagna, Rashi & Nakshatra overview; One focus question; Simple remedies
Complete Kundli ("Most popular")	₹999	45 min	Full Janam Kundli analysis; Career, marriage & finance; Mahadasha & yearly forecast; Personalised remedies
Kundli Milan	₹1,499	60 min	Ashtakoot Guna Milan (36 gunas); Manglik & dosha check; Muhurat suggestion; Follow-up Q&A

- **Form:**
 - Its heading shows the selected plan name · price.
 - Mode toggle buttons: Chat / Call / Video. The default is Call, or the `?mode=` parameter.
 - Fields:
 1. Astrologer (dropdown): "Any available astrologer (fastest)" or one of the 8 experts (name · title). `?astro=<id>` presets it.
 2. Full name: required, at least 2 characters.
 3. Mobile number: required. The last 10 digits must match an Indian mobile number (`^[6-9]\d{9}$`).
 4. Email (optional): validated as text@text.text if filled.
 5. Date of birth: optional, not validated.
 6. Preferred session date: required, minimum today.
 7. "What would you like guidance on?" textarea: optional.
- **Button:** "Book Now · ₹".

- On a valid submit it shows "Booking your session..." for **1 second** (`setTimeout`), then a success panel:
 - ॐ, "Your consultation is booked!"
 - "Thank you, . Your session [with] is reserved. We will confirm the time on +91 ."
- The success panel has a "Book another session" button that resets the form.
- **FAQ sidebar** (accordion; the first item is open by default):
 - Do I need my exact birth time?
 - Which languages are available?
 - Can I reschedule? (free up to 24 h before)
 - Is astrology a substitute for professional advice? (No)
- **Contact info:** namaste@vedicdhaam.com; "Every day · 6 AM – 11 PM IST".
- **LIMITATION: nothing is sent or stored.**
 - There is no API call, email, database or payment gateway. The "booking" is a simulated client-side success message, and the data is lost when the page reloads.
 - The mode chosen is not used in the confirmation.
 - The price is shown, but no payment is taken.
 - Other pages promise "First consultation FREE", which conflicts with these prices.

2.5 /horoscope: Daily / Weekly / Monthly Horoscope (static page, query parameters)

- **Metadata title:** "Horoscope · राशिफल". Description: "Free daily, weekly and monthly horoscope (rashifal) for all 12 zodiac signs in Hindi and English."
- **Header:** "Daily **Horoscope**" / "दैनिक राशिफल".
- **Inputs:**
 - A 12-button sign picker (glyph + name; default Aries, or `?sign=`). Choosing a sign updates the URL with `router.replace` to `/horoscope?sign=x[&period=y]`.
 - Period tabs: Today / This Week / This Month (default daily, or `?period=`). Note: the tabs do not update the URL.
- **Output (main card):**
 - Large glyph, sign name (with the English name in brackets in Hindi mode), dates · element (coloured) · ruler.
 - The period label:
 - daily: full date
 - weekly: Sunday–Saturday range of the current week
 - monthly: month and year
 - The reading paragraph ("Consulting the stars..." until the date resolves on the client).
 - 3 area blocks, each with an icon, a score % meter and one sentence: Love & Relationships, Career & Money, Health & Wellness.
- **Sidebar:**
 - "Cosmic Snapshot": Mood, Lucky color, Lucky number, Lucky time, Overall luck %.
 - "Best match" card: links to `/compatibility?a=<sign>&b=<match>` (auto-reveals).
 - "About " card with the summary: links to `/zodiac/<sign>`.
 - Promo "Want a personal reading? ... First consultation FREE.": links to `/astrologers`.

- **How it is generated:** see 1.6. It is template sentences chosen by a PRNG seeded with sign + period + date.
 - The reading is stable for the day/week/month and the same for all users on the same local date.
 - It has **no astrological basis**: no planetary transits are used.
 - The weekly key uses its own week-number formula, while the label shows Sunday–Saturday. They should broadly agree.

2.6 /numerology: Numerology Calculator (static)

- **Metadata title:** "Numerology Calculator · अंक ज्योतिष". Description: "Calculate your Mulank, Bhagyank (Life Path), Name Number, Soul Urge and Personality numbers."
- **Header:** "Numerology **Calculator**".
- **Form fields:**
 1. Full name (in English letters). It must contain at least one Latin letter. A name typed in Devanagari is rejected ("Please enter your full name in English letters.").
 2. Date of birth: required.
- **Button:** "◆ **Reveal My Numbers**".
- **Output:**
 - Five number tiles, each acting as a tab:

Tile	Shown as
Mulank	"Psychic number · your nature"
Bhagyank (Life Path)	"Your destiny & life purpose"
Name Number (नामांक)	"Your natural talents"
Soul Urge (आत्मांक)	"Your heart's desire"
Personality	"How others see you"

- Clicking a tile shows a detail card: the big number, the label, the meaning title, the text and 3 keyword pills, in the current language.
- **Calculation:** Pythagorean system, as in 1.7. If the name has no vowels (or no consonants), Soul Urge (or Personality) falls back to the Name Number.

2.7 /panchang: Today's Panchang (static page, client calculation)

- **Metadata title:** "Today's Panchang · आज का पंचांग". Description: "Daily Hindu Panchang: Tithi, Nakshatra, Yoga, Karana, sunrise, sunset, Rahu Kaal, Abhijit Muhurat and Choghadiya for Indian cities."
- **Header:** "Today's **Panchang**".
- **Controls:**
 - "<" previous-day and ">" next-day buttons, which shift the date by ± 1 day.
 - A date picker (range 1900-01-01 to 2100-12-31). It defaults to the browser's today, set after mount to avoid a server/client mismatch.
 - A city dropdown (the 16 **CITIES**, default New Delhi).
- **Output:**
 - **Hero:**
 - day number, month and year, Vaara

- paksha + tithi name, with a progress bar showing the share of the tithi elapsed at sunrise
 - Sunrise and Sunset times
- **Five limbs (cards 1–5):** Tithi (+paksha), Nakshatra (+Pada), Yoga, Karana, Vaar.
- **"Auspicious & Inauspicious Timings":** Abhijit Muhurat (good); Rahu Kaal, Yamaganda, Gulika Kaal (bad), each shown as a start–end range.
- **"Sun & Moon":** Moon sign (Chandra Rashi), Sun sign (Surya Rashi), both sidereal; Day length (dinmaan) h m; Ayanamsa (Lahiri) xx.xx°.
- **Day Choghadiya and Night Choghadiya:** 8 slots each, with name and time range, coloured good/neutral/bad. When the selected date is today, the current slot is highlighted with "Now".
- **Note on the page:** values are as at local sunrise, and timings may differ from printed almanacs by a few minutes.
- **Calculation:** see 1.3. Real astronomical approximations: NOAA sunrise, low-precision Sun, simplified Moon (about 1°), linear Lahiri.
 - Since the Moon can be off by about 1°, a tithi (12°) or nakshatra (13°20') close to a change-over can be shown wrong around sunrise.
 - No end times are given for the limbs.
 - "Now" highlighting uses the browser's local clock, not the selected city's time zone.
- **Spot check:** 3 Oct 2026, New Delhi gives Krishna Saptami, Ardra pada 1, Variyana yoga, Bava karana, sunrise 6:14 AM, sunset 6:06 PM, Rahu Kaal 9:12–10:41 AM (Saturday, 3rd part), ayanamsa 24.227°.

2.8 /tarot: Free Tarot Reading (static)

- **Metadata title:** "Tarot Reading · टैरो रीडिंग". Description: "Draw a free three-card tarot spread revealing your past, present and future."
- **Header:** "Free Tarot Reading".
- **Intro state:**
 - A fanned deck of 5 card backs (SVG with ॐ).
 - "Your question (optional)" input, placeholder "What should I focus on this month?".
 - Button "♠ **Shuffle & Draw**". It shows a CSS shuffle animation and the label "Shuffling the deck..." for 1.2s, then draws 3 cards.
- **Spread state:**
 - The question is echoed in quotes.
 - The instruction "Tap each card to reveal it."
 - 3 face-down cards labelled Past / Present / Future, each with its hint.
 - Clicking a card flips it (CSS 3D rotateY):
 - The front shows the numeral, icon and English name. The front name is always English, even in Hindi mode.
 - Reversed cards are rendered rotated 180°.
 - Below, a meaning card appears with the position, the localized card name, a "Reversed" tag if applicable, and the upright or reversed meaning.
 - When all 3 are flipped: "Your reading is revealed." and a button "🔄 **Draw Again**", which reshuffles. The question is kept.
- **Calculation:** a true random Fisher–Yates shuffle of 22 Major Arcana, 30% reversal chance per card (see 1.8).

- The question has no effect on the result. Draws are not saved or reproducible.
- There is no Minor Arcana and only one spread.

2.9 /zodiac: Zodiac Signs (static)

- **Metadata title:** "Zodiac Signs · राशियाँ". Description: "Explore all twelve zodiac signs (rashi): elements, ruling planets, traits, strengths and weaknesses."
- **Header:** "Explore the **Zodiac**" / "जानिए राशिचक्र", crumb "Zodiac Signs".
- **Filter tabs:** All / Fire / Earth / Air / Water (Hindi labels in Hindi mode). Choosing an element shows that element's bilingual description.
- **Grid of 12 cards** (or the filtered subset). Each card has an accent colour from its element and shows:
 - glyph, element label, name, dates
 - symbol · "Ruled by" ruler
 - the first 3 traits as pills
- Each card links to `/zodiac/<slug>`.

2.10 /zodiac/[sign]: Sign detail (dynamic route, pre-rendered)

- **Static generation.** `generateStaticParams` returns the 12 slugs (aries ... pisces), so all 12 pages are statically generated. An unknown slug calls `notFound()`, which gives a 404.
- **Metadata (per sign, from `generateMetadata`):**
 - Title: "`<Name>` · `<Hindi name>` (`<dates>`)", e.g. "Aries · मेष (Mar 21 – Apr 19) · VedicDhaam".
 - Description: " () zodiac sign: traits, strengths, weaknesses, compatibility and more."
- **Hero:**
 - A large glyph emblem, an eyebrow with the symbol, an H1 with the name (English name beside it in Hindi mode), and the summary.
 - A facts grid: Dates, Element (in element colour), Modality, Ruling planet, Lucky number, Lucky color.
 - Buttons:
 - "Today's Horoscope" goes to `/horoscope?sign=<slug>`.
 - "Check Compatibility" goes to `/compatibility?a=<slug>`. This has no `b` parameter, so the result is not auto-revealed.
- **Sections:**
 - "Core traits": 4 pills.
 - Strengths card (thumbs up) and Weaknesses card (thumbs down).
 - "Best matches for ": the top 3 other signs by `getCompatibility(...).overall`, each showing a score % and linking to `/compatibility?a=<slug>&b=<match>`.
 - A pager: ← previous sign, "All Signs" (/zodiac), next sign →, wrapping around Pisces↔Aries.
 - Sections fade in on scroll through the `Reveal` component.
- **Content:** static data from `lib/zodiac.js`, localized.

3. Accuracy summary

Feature	Method	Accuracy
Kundli: planet signs, nakshatra, lagna	Real astronomy (low-precision Sun, simplified Moon, JPL Kepler elements, standard ascendant formula, linear Lahiri, whole-sign houses, mean Rahu)	Approximate but genuine; sign level is generally right; Moon $\sim 1^\circ$
Vimshottari dasha	Correct traditional algorithm (balance from Moon's nakshatra)	Inherits the Moon error
Manglik	Mars house 1/2/4/7/8/12 from the Lagna only	Simplified rule
Panchang (5 limbs, sun times, Rahu Kaal, Choghadiya)	Real calculations at sunrise; NOAA sunrise	Within minutes; limbs near transitions can be off
Compatibility / "Guna Milan"	Element + aspect + modality arithmetic on sun signs	Not astronomical; not real Ashtakoot
Horoscope	Seeded-random template sentences	No astrological basis
Numerology	Standard Pythagorean method	Deterministic and correct for that system
Tarot	<code>Math.random</code> shuffle of 22 cards	Random by design
Contact booking	Simulated	No backend

CHAPTER 4

Jyotish Seekhen (Course) & Karmkand (Rituals)

ज्योतिष सीखें एवं कर्मकांड

General facts that apply to both sections:

- **Hindi only.** None of these pages imports the site's language/i18n context. Every title, lesson, pooja, mantra and UI label is hard-coded in Hindi (Devanagari). The only bilingual parts are the menu labels in `lib/nav.js` (for example "Learn Astrology / ज्योतिष सीखें", "Pooja Paddhati (Rituals)", "Pooja Samagri (Items)"). The English titles shown in this document are translations added for this document; they are not in the code.
- **All content is static.** It lives in JS data modules under `lib/`. There is no CMS, database or API. Detail pages are pre-rendered with `generateStaticParams`.
- **Data is stored only in this browser.** Lesson progress and checklist state are saved in `localStorage`. They are not tied to any user account.
- **Numbers are shown in Devanagari digits**, using `hindiNum()` in `lib/jyotish/num.js` and a copy of it, `toHindiDigits()`, in `PoojaSteps.js`.
- **Shared components used:** `@/components/PageHeader` (eyebrow, title, highlight, crumb, lead) and `@/components/Reveal` (a scroll-reveal wrapper with an optional `delay`). Icons come from `lucide-react`.

SECTION A: "Jyotish Seekhen" (Learn Astrology), a free course

Files

File	Lines	Role
<code>app/jyotish-seekhen/page.js</code>	91	Hub page (server component)
<code>app/jyotish-seekhen/CourseMap.js</code>	91	Client component: progress card and lesson path
<code>app/jyotish-seekhen/jyotish.module.css</code>	431	Hub styles
<code>app/jyotish-seekhen/[slug]/page.js</code>	209	Lesson page (server component, statically generated)
<code>app/jyotish-seekhen/[slug]/Quiz.js</code>	100	Client component: multiple-choice quiz
<code>app/jyotish-seekhen/[slug]/CompleteButton.js</code>	41	Client component: mark a lesson complete
<code>app/jyotish-seekhen/[slug]/lesson.module.css</code>	697	Lesson styles
<code>lib/jyotish/lessons.js</code>	23	Combines the three parts; exports helpers
<code>lib/jyotish/num.js</code>	2	<code>hindiNum(n)</code> : converts digits to Devanagari
<code>lib/jyotish/part1.js</code>	342	Lessons 1–4
<code>lib/jyotish/part2.js</code>	351	Lessons 5–8
<code>lib/jyotish/part3.js</code>	364	Lessons 9–12
<code>lib/jyotish/progress.js</code>	53	<code>useProgress()</code> hook (localStorage)

URL routes

- `/jyotish-seekhen`: the course hub.
- `/jyotish-seekhen/[slug]`: one page per lesson, 12 in total, pre-rendered by `generateStaticParams()` from `LESSONS`. An unknown slug calls `notFound()`.
- The 12 slugs: `jyotish-kya-hai`, `navgrah`, `barah-rashiyen`, `barah-bhav`, `sattais-nakshatra`, `kundli-kaise-padhen`, `panchang-ke-paanch-ang`, `dasha-pranali`, `grah-avastha-sambandh`, `pramukh-yog`, `pramukh-dosh`, `jyotishiya-upay`.
- Entry points from elsewhere on the site:
 - Main nav item "Learn Astrology", with a "Free / मुफ्त" badge (`lib/nav.js`).
 - A footer/quick link (`lib/nav.js`).
 - A home-page card (`components/home/HomeClient.js`).
 - The last step of the Karmkand learning path on `/karmkand`.

Data layer (`lib/jyotish/lessons.js`)

- `LESSONS = [...PART1, ...PART2, ...PART3]`, sorted by `number`. A code comment says: "12 lessons, beginner to intermediate level".
- `getLesson(slug)`: looks up a lesson by slug.
- `TOTAL_MINUTES`: the sum of `minutes` across lessons, which is **215**.
- `LESSON_CARDS`: a lightweight projection `{slug, number, title, subtitle, icon, level, minutes}`, small enough to pass to the client `CourseMap`.
- Re-exports `hindiNum`.

Shape of a lesson object

```
{ slug, number, title, subtitle, icon (emoji), level ('प्रारंभिक' = Beginner | 'मध्यम' = Intermediate), minutes,
  intro: string,
  sections: [ { heading, paragraphs?: string[], points?: string[], table?: {columns: string[], rows: string[][]},
    tip?: string } ],
  summary: string[] // always 4 bullet points
  quiz: [ { q, options: [4 strings], answer: index 0-3, explain } ] }
```

Hub page (`/jyotish-seekhen`) structure

1. **Metadata**. Title: "ज्योतिष सीखें — मूल से गहराई तक, शुद्ध हिंदी में" ("Learn astrology, from basics to depth, in pure Hindi"). The description lists the topics and mentions the quizzes.
2. **PageHeader**:
 - eyebrow "निःशुल्क पाठ्यक्रम" (Free course)
 - title "ज्योतिष" with highlight "सीखें"
 - crumb "ज्योतिष सीखें"
 - a lead paragraph
3. **Stats row** (4 tiles, all computed except the last):
 - lesson count: १२ विस्तृत पाठ (12 detailed lessons)
 - hours: `Math.round(215/60)` = ४+ घंटे अध्ययन सामग्री (4+ hours of study material)
 - total quiz questions: ५१ अभ्यास प्रश्न (51 practice questions)

- "१००% निःशुल्क" (100% free), which is hard-coded
4. "कैसे सीखें?" (How to learn?): 3 numbered steps.
- 📖 पाठ पढ़ें (Read the lesson)
 - 🧠 प्रश्नोत्तरी हल करें (Solve the quiz)
 - 🙋 अभ्यास करें (Practise on your own free kundli)
5. `<CourseMap lessons={LESSON_CARDS} />`: progress card plus an ordered path of 12 lesson cards (described below).
6. "आगे क्या?" (What next?) call to action: "सीखे हुए ज्ञान को अपनी कुंडली पर परखें" (Test what you learned on your own chart). Two buttons:
- `/birth-chart` "मुफ्त कुंडली बनाएँ" (Make a free kundli)
 - `/panchang` "आज का पंचांग" (Today's panchang)

CourseMap (client component)

- Uses `useProgress()` and reads `done` (an array of completed slugs), `ready` and `reset`.
- Values it computes:
 - `completed` = the number of lessons whose slug is in `done`
 - `percent` = $\text{round}(\text{completed} / 12 \times 100)$
 - `nextLesson` = the first lesson not done, or lesson 1 if every lesson is done
- **Progress card** messages:
 - nothing done (or not yet loaded): "पहले पाठ से आरंभ करें..." (Start from the first lesson)
 - partly done: "आपने १२ में से N पाठ पूर्ण किए हैं। अध्ययन जारी रखें!" (You have completed N of 12 lessons. Keep studying!)
 - all done: "बधाई हो! आपने सभी पाठ पूर्ण कर लिए हैं।" (Congratulations, you have completed all lessons)
- **Progress bar** (`role="progressbar"` with aria values) and a percentage. Next to it:
 - while unfinished: a link "आरंभ करें" (Start) or "जारी रखें" (Continue) to the next lesson
 - when all are done: a Trophy icon
- **Reset button** "पुनः आरंभ" (Restart), shown only when more than 0 lessons are done. It wipes progress immediately, with **no confirmation dialog**.
- **Lesson path** (`<ol>`). Each item has:
 - a dot showing the lesson number, or a CircleCheck icon if done
 - a card linking to `/jyotish-seechen/{slug}` that shows: icon, "पाठ N", level badge (Intermediate gets a different style), title, subtitle, minutes, and a "✓ पूर्ण" (done) tag
- Before `ready` (that is, until `localStorage` has been read after mount), nothing is shown as done. This avoids a hydration mismatch.

Progress tracking (lib/jyotish/progress.js)

- **localStorage key**: `vedicdhaam-jyotish-progress`. The value is a JSON array of lesson slugs, e.g. `["jyotish-kya-hai", "navgrah"]`.
- `read()`:
 - parses the stored value
 - keeps only string entries

- returns `[]` on any error or if the value is not an array
- `write()`: wrapped in try/catch, so it fails silently.
- `useProgress()`:
 - starts with `done=[]` and `ready=false`
 - in `useEffect` it reads storage, sets `ready=true`, and subscribes to the window `storage` event, so another browser tab updating the key keeps it in sync
 - `setComplete(slug, value)` adds the slug (de-duplicated with a Set) or removes it, then writes
 - `reset()` writes `[]`
- Progress is recorded **only** when the user clicks "पाठ पूर्ण करें" (Mark lesson complete). Quiz results are **not** saved and do **not** affect completion.

Lesson page (`/jyotish-seekhen/[slug]`) structure

- **Metadata:**
 - title: "पाठ N: {title} — ज्योतिष सीखें"
 - description: the lesson subtitle
- **Banner** (mandala background):
 - breadcrumbs: होम › ज्योतिष सीखें › पाठ N
 - large emoji icon
 - meta line: "पाठ N / १२", level badge, minutes
 - H1 title and subtitle
- **Two-column layout.** At widths of 1000px and below it becomes a single column.
 - **Left: sticky table of contents** ("इस पाठ में", In this lesson). It is a `<details>` element, open by default, with anchor links to:
 - `#parichay` (Introduction)
 - `#khand-1 ... #khand-N` (one per section heading)
 - `#saransh` (Summary)
 - `#prashnottari` (Quiz)
 - **Content column:**
 1. Intro paragraph.
 2. Each section: a numbered H2, then whichever of these the section has:
 - paragraphs
 - bullet points
 - a table (inside a scrollable, focusable region with a sticky header; the first column is rendered as row headers)
 - a "याद रखें" (Remember) tip box with a Lightbulb icon
 3. "सारांश — मुख्य बिंदु" (Summary, key points): a list of 4 points.
 4. "प्रश्नोत्तरी — अपना ज्ञान परखें" (Quiz, test your knowledge): the `<Quiz>` component.
 5. `<CompleteButton slug nextSlug>`.
 6. **Pager:**
 - Previous: the previous lesson, or "वापस / पाठ्यक्रम सूची" (Back to course list) on lesson 1

- Next: the next lesson, or on lesson 12 "अभ्यास करें / अपनी कुंडली बनाएँ" (Practise, make your kundli), which links to `/birth-chart`

Quiz logic (`Quiz.js`)

- **State:**
 - `answers`: one entry per question, initially `null`
 - `round`: a counter used as the React `key`, so a retry remounts the quiz
- **Answering:**
 - Options are labelled with Hindi letters क, ख, ग, घ.
 - Clicking an option locks that question; the answer cannot be changed (`if (answers[qi] !== null)` `return`, and the buttons become `disabled`).
 - Once answered:
 - the correct option turns green with a ✓
 - a wrong pick turns red with an X
 - the other options are dimmed
 - an explanation line appears: "सही उत्तर!" (Correct!) or "सही उत्तर: क) ..." (Correct answer: ...), followed by the `explain` text
- **Score bar** (`aria-live="polite"`):
 - while unfinished: "X / N प्रश्न हल किए — किसी विकल्प पर क्लिक करें" (X of N answered, click an option)
 - when finished: Trophy icon, "आपका परिणाम: S / N" (Your result: S of N), and a verdict
- **Verdicts:**
 - all correct: "उत्कृष्ट!..." (Excellent)
 - `score ≥ ceil(60% of N)`: "बहुत अच्छा!..." (Very good)
 - otherwise: "कोई बात नहीं — पाठ एक बार फिर पढ़ें..." (No problem, read the lesson again)
- **Retry:** the "पुनः प्रयास" (Try again) button resets all answers.
- **No persistence:** the quiz score is not saved anywhere.

CompleteButton (`CompleteButton.js`)

- **Not yet done:**
 - text: "क्या आपने यह पाठ पढ़ लिया?" (Have you read this lesson?)
 - button "✓ पाठ पूर्ण करें" (Mark lesson complete), disabled until `ready`
- **Done:**
 - text: "यह पाठ पूर्ण हो गया है!" (This lesson is complete) and "आपकी प्रगति सहेज ली गई है..." (Your progress has been saved)
 - an "अपूर्ण करें" (Mark incomplete) button that undoes it
 - an "अगला पाठ →" (Next lesson) button if there is a next lesson

Full list of the 12 lessons

Totals across the course: **215 minutes** of reading time, **51 quiz questions**, and **4 summary points in every lesson**. Each quiz question has exactly 4 options and an explanation.

The split is 6 Beginner lessons (1, 2, 3, 4, 5, 7) and 6 Intermediate lessons (6, 8, 9, 10, 11, 12). Lesson 7 is Beginner even though it comes after the first Intermediate lesson.

What each lesson teaches (section headings and key content)

Lesson 1: What is Jyotish? (subtitle: "Eye of the Vedas: introduction, history and purpose")

- Sections:
 - Jyotish as the eye of the Vedas: the 6 Vedangas, and the texts Vedanga Jyotisha (Lagadha), Brihat Parashara Hora Shastra, Varahamihira's Brihat Samhita and Brihat Jataka, and Surya Siddhanta.
 - The three skandhas (Siddhanta, Samhita, Hora), shown as a table.
 - Branches of phalit jyotish: Jataka, Muhurta, Prashna, Gochar, Varshaphal, Melapak.
 - The real purpose of jyotish: planets are indicators, not causes.
 - Myths vs truth, shown as a 4-row table.
- Quiz topics: meaning of "jyotish" (light), the "eye of the Veda", which skandha studies an individual chart, and the author of BPHS.

Lesson 2: The Nine Planets (subtitle: "Sun to Ketu: nature, significations, traits")

- Sections:
 - Classification into benefics, malefics and shadow planets.

2. A master navagraha table with 10 columns: significations, nature, weekday, colour, gem, metal, own sign, exaltation, debilitation. There is a note that schools disagree on Rahu/Ketu exaltation.
 3. Sun and Moon (king and queen).
 4. Mars, Mercury, Jupiter.
 5. Venus, Saturn, Rahu, Ketu, ending with a one-word memory key for each planet.
- Quiz (5 questions): Sun's exaltation, the significator of mind, Saturn's debilitation, Jupiter's gem, the Rahu–Ketu distance (180°).

Lesson 3: The Twelve Signs (subtitle: "Lords, elements, nature, body parts")

- Sections:
 1. A 12-row sign table: number, symbol, lord, element, modality, body part. It notes that North Indian charts write signs as numbers 1–12.
 2. The four elements.
 3. The three modalities (movable, fixed, dual).
 4. Other classifications: male/odd and female/even signs, and directions.
 5. Tropical (sayana) vs sidereal (nirayana) zodiac: an ayanamsha of about 24°, and that Lahiri ayanamsha is official in India.
- Quiz topics: lord of Cancer, the odd one out among fire signs, sign number 8, the fixed signs.

Lesson 4: The Twelve Houses (subtitle: "Mirror of every area of life")

- Sections:
 1. A 12-row house table: classical name, main topics, group (kendra, trikona, dusthana, upachaya, maraka).
 2. Kendras (Vishnu sthana).
 3. Trikonas (Lakshmi sthana), with a teaser for the raja yoga lesson (Lesson 10).
 4. Dusthana, upachaya and maraka houses.
 5. Bhavesh (house lord), the three-factor rule, and "bhava from bhava".
- Quiz (5 questions): the marriage house, which house is a trikona, the career house, the 7th lord when Libra is in the 7th, and which house is not upachaya.

Lesson 5: The 27 Nakshatras (subtitle: "Moon's 27 resting places: lords, deities, padas, gandmool")

- Sections:
 1. Span and padas: 13°20' per nakshatra and 3°20' per pada; 108 padas, which explains the 108 beads of a mala; 9 padas per sign.
 2. A 27-row nakshatra table: lord, sign, deity. It explains that the lord sequence is the basis of the Vimshottari dasha.
 3. Ganas (Deva, Manushya, Rakshasa), with the nakshatras in each.
 4. Gandmool nakshatras at the water–fire sign junctions, all ruled by Mercury or Ketu.
- Quiz topics: the span of a nakshatra, the lord of Pushya, which nakshatra is gandmool, and why 108.

Lesson 6: How to Read a Birth Chart (subtitle: "North Indian chart layout, identifying lagna, aspects, step-by-step method")

- Sections:
 1. Layout of the North Indian diamond chart: houses are fixed, the top-centre diamond is the lagna, and counting goes anticlockwise. It contrasts this with the South Indian chart. It notes that the site's own

kundli uses this style.

2. Identifying the lagna and the lagna lord.
 3. Planetary aspects table: all planets aspect the 7th; Mars also 4 and 8; Jupiter 5 and 9; Saturn 3 and 10; Rahu/Ketu disputed. Includes a worked example.
 4. Conjunction (yuti) and exchange (parivartan).
 5. A 7-step reading method and the "three-factor rule": house, lord and karaka must agree.
- Quiz topics: where the lagna sits, Jupiter's special aspects, Saturn in the 1st, the lagna lord when 5 is in the lagna.

Lesson 7: The Five Limbs of the Panchang (subtitle: "Tithi, vaar, nakshatra, yoga, karana")

- Sections:
 1. Tithi: 12° of Moon–Sun separation, 30 tithis, the two pakshas, and a formula.
 2. Vaar (weekday): the Hindu day runs sunrise to sunrise.
 3. Nakshatra of the day.
 4. Yoga: $(\text{Sun} + \text{Moon}) \div 13^\circ 20'$, 27 yogas, with Vyatipata and Vaidhriti inauspicious.
 5. Karana: half a tithi, 11 types (7 movable, 4 fixed); Vishti = Bhadra.
 6. Hindu months: purnimanta vs amanta reckoning, and adhik maas.
- Quiz topics: the tithi span, when the day starts, Bhadra, the end of shukla paksha.

Lesson 8: The Vimshottari Dasha System (subtitle: "A method for timing life events")

- Sections:
 1. Dasha order and length, as a table: Ketu 7, Venus 20, Sun 6, Moon 10, Mars 7, Rahu 18, Jupiter 16, Saturn 19, Mercury 17, for a total of 120 years.
 2. Finding the first dasha, in 5 steps (balance of dasha).
 3. A worked example table: birth on 1 Jan 2000 with the Moon in the middle of Rohini, giving Moon 2000–05, Mars to 2012, Rahu to 2030, Jupiter to 2046, Saturn to 2065. It mentions that the site's free kundli computes this automatically.
 4. Antardasha: formula $(\text{MD years} \times \text{AD years}) \div 120$, plus pratyantar dasha.
 5. How to judge a dasha's results: 5 factors.
- Quiz (5 questions): the 120-year total, Venus's 20 years, Magha → Ketu, what follows Rahu, Venus/Venus = 3 years 4 months.

Lesson 9: Planetary States & Relationships (subtitle: "Exaltation, debilitation, moolatrikona, friendship, retrograde, combust")

- Sections:
 1. The order of strength: exalted > moolatrikona > own sign > friend's sign > neutral > enemy's sign > debilitated.
 2. Table of exaltation (with exact degrees), debilitation, moolatrikona and own signs for 7 planets, with a tip on neecha-bhanga raja yoga.
 3. Natural friendship table (friends, neutrals, enemies); the Moon has no enemies.
 4. Retrograde planets.
 5. Combustion table with orbs: Moon 12° , Mars 17° , Mercury $14^\circ/12^\circ$, Jupiter 11° , Venus $10^\circ/8^\circ$, Saturn 15° .
- Quiz topics: Jupiter's exaltation, Saturn's moolatrikona, which planet is never retrograde, the Sun's enemies.

Lesson 10: Major Yogas (subtitle: "Raja yoga, Gajakesari, Pancha Mahapurusha, Budhaditya, Dhana, Vipareeta")

- Sections:
 1. Raja yoga: kendra lord plus trikona lord, the 9th–10th lord yoga, and yogakaraka planets.
 2. Gajakesari (Jupiter in a kendra from the Moon).
 3. Pancha Mahapurusha table: Ruchaka, Bhadra, Hamsa, Malavya, Shasha.
 4. Budhaditya yoga.
 5. Dhana yoga (lords of 2, 5, 9, 11).
 6. Vipareeta raja yoga: Harsha, Sarala, Vimala.
- Quiz topics: Gajakesari, Jupiter's mahapurusha yoga, the yogakaraka for Taurus lagna, the 8th lord in the 12th = Sarala.

Lesson 11: Major Doshas, a Balanced View (subtitle: "Mangal, Kaal Sarp, Pitru, Sade Sati/Dhaiya, Grahan")

- Sections:
 1. Manglik: Mars in houses 1, 2, 4, 7, 8, 12, which affects 40–50% of charts; 4 cancellation rules.
 2. Kaal Sarp: notes it is not clearly mentioned in BPHS.
 3. Pitru dosha, with service and shraddha as remedies.
 4. Sade Sati and Dhaiya, with a 3-phase table.
 5. Grahan dosha.
 6. "Duty of a jyotish student": 4 ethics points.
- The lesson's aim is explicitly to reduce fear.
- Quiz topics: which house does not make a manglik, the length of sade sati, dhaiya houses, the conjunction that forms grahan dosha.

Lesson 12: Astrological Remedies (subtitle: "Mantra, daan, vrat, seva and gems: correct method and cautions")

- Sections:
 1. Five kinds of remedy.
 2. Table of planet → bija mantra, donation items, weekday, service/conduct, for all 9 planets.
 3. Gemstone cautions, 5 points: never wear one without chart analysis, and so on.
 4. Fasting and lifestyle.
 5. Ethics of remedies: beware of fear-selling, and remedies are not a substitute for doctors, lawyers or financial advisers.
- Quiz topics: a donation for Saturn, the Jupiter mantra, the correct statement about gems, a service for the Moon.

Limitations: Section A

- **Hindi only**, even though the site is bilingual. Lesson titles and content are not translated.
- **Progress is per browser**. It lives in localStorage and is not linked to an account or synced across devices. Clearing browser data or using private mode loses it.
- **Completion is self-declared**. A lesson counts as done when the user clicks the button; quiz performance is not required, and quiz scores are never stored.
- **Reset has no confirmation**. "पुनः आरंभ" wipes all progress with one click.
- **Text only**. No diagrams or images of charts, even though Lesson 6 describes the chart layout in words. No audio and no video.

- **The quiz is fixed.** Options are not shuffled, questions are not randomised, and the correct index is visible in the client bundle.
- **Content is hard-coded in JS**, so editing it requires a code change and redeploy.
- **Some numbers and example years are fixed in the content** (e.g. "4+ hours" comes from 215 minutes; the Lesson 8 example is fixed at 2000–2065).
- There is no certificate, account, or teacher interaction.

SECTION B: "Karmkand" (Rituals: pooja method and pooja items)

Files

File	Lines	Role
app/karmkand/page.js	237	/karmkand intro hub (server)
app/karmkand/PoojaCard.js	29	Card linking to a pooja (server-renderable)
app/karmkand/karmkand.module.css	1466	All Karmkand styles
app/karmkand/pooja-paddhati/page.js	22	Pooja list page
app/karmkand/pooja-paddhati/PoojaList.js	32	Client component: category filter and grid
app/karmkand/pooja-paddhati/[slug]/page.js	199	Pooja detail (server, static params)
app/karmkand/pooja-paddhati/[slug]/MantraCard.js	33	Client component: mantra with copy button
app/karmkand/pooja-paddhati/[slug]/PoojaSteps.js	118	Client component: step timeline and full-screen "Pooja Mode"
app/karmkand/pooja-paddhati/[slug]/SamagriChecklist.js	77	Client component: checklist of required items (localStorage)
app/karmkand/pooja-samagri/page.js	22	Samagri encyclopedia page
app/karmkand/pooja-samagri/SamagriKosh.js	172	Client component: search, category filter, detail modal
lib/karmkand/poojas.js	626	10 poojas, categories, shared mantras
lib/karmkand/samagri.js	264	57 items in 8 categories

URL routes

- /karmkand : intro hub.
- /karmkand/pooja-paddhati : list of all poojas, with a category filter.
- /karmkand/pooja-paddhati/[slug] : 10 detail pages via generateStaticParams ; an unknown slug gives notFound(). Page anchors:
 - #parichay (Introduction)
 - #samay (Time & direction)
 - #samagri (Items)
 - #taiyari (Preparation)
 - #vidhi (Method)

- [#mantra](#) (Mantras)
- [#niyam](#) (Rules & benefits)
- [#prashn](#) (Q&A)
- </karmkand/pooja-samagri>: the samagri encyclopedia ("कोश"). It supports **hash deep links** such as </karmkand/pooja-samagri#kalash>, which open that item's modal.
- Linked from:
 - the main nav dropdown (Karmkand intro, Pooja Paddhati, Pooja Samagri, Daily Pooja Vidhi, Havan Vidhi)
 - footer links
 - [lib/content.js](#) quick links (Rudrabhishek, Havan, Lakshmi poojan)
 - the home page [KarmkandSection.js](#), which links to e.g. [dainik-pooja#samagri](#) and [ganesh-poojan#vidhi](#)

[/karmkand](#) hub page structure

1. **Metadata.** Title: "कर्मकांड — पूजा पद्धति एवं पूजा सामग्री" (Karmkand: pooja method and pooja items).
2. **PageHeader:** eyebrow "सनातन पूजा विधान", title "कर्मकांड", highlight "सरल हिंदी में" (in simple Hindi).
3. **Intro: "कर्मकांड क्या है?" (What is karmkand?)**
 - The three parts of the Vedas: karma kanda, upasana kanda, jnana kanda.
 - The two parts of karmkand: pooja paddhati (method) and pooja samagri (items).
 - A shloka box with Bhagavad Gita 9.26 ("पत्रं पुष्पं फलं तोयं..."), its meaning in Hindi, and the citation.
4. **Three pillars:** 🙏 श्रद्धा (devotion), 💧 शुद्धि (purity), 🕉 विधि (method).
5. **"कहाँ से आरंभ करें?" (Where to start?):** two large link cards.
 - **Pooja Paddhati:** says "{POOJAS.length} poojas" (10), lists the first 5 pooja names with the part after " ("stripped, then "और भी..." (and more).
 - **Pooja Samagri:** says "{SAMAGRI.length} items" (57) and lists the first 5 categories with icons.
6. **"पूजा से पहले छह बातें जानें" (Six things to know before pooja):** 6 principle cards.
 - शुद्धि: purity
 - दिशा: face east or north; the shrine is best in the north-east
 - समय: brahma muhurta or sandhya
 - आसन: kusha, wool or blanket seat
 - संकल्प: the vow
 - श्रद्धा: devotion; a mistake is fixed by a prayer of forgiveness
7. **Shodashopachar / Panchopachar table:** 16 upachars, each with a meaning. Gandh, Pushp, Dhoop, Deep and Naivedya (numbers 10–14) are marked "✓ पंचोपचार", meaning they are the five used in daily pooja.
8. **"चार चरणों में पूजा में निपुण बनें" (Master pooja in four steps):** a learning path.
 - [dainik-pooja](#)
 - [pooja-samagri](#)
 - [shodashopachar-poojan](#)
 - [/jyotish-seechen](#)
9. **"प्रमुख पूजा विधियाँ" (Main pooja methods):** the first 6 poojas as [PoojaCard](#)s, plus a "सभी देखें" (View all) link.

PoojaCard

- Links to `/karmkand/pooja-paddhati/{slug}`.
- Has a colour-tone class `tone_{pooja.tone}`. The tones are saffron, rose, vermilion, gold, yellow, indigo, night, fire, green.
- Shows: emoji, name, deity, short description, level (Signal icon), duration (Clock icon), and "{steps.length} चरण" (N steps).

Pooja list (`/karmkand/pooja-paddhati`)

- PageHeader: "पूजा पद्धति", eyebrow "कर्मकांड · प्रथम अंग" (Karmkand, first part).
- `PoojaList` (client component):
 - category **filter chips** (`aria-pressed`) built from `POOJA_CATEGORIES`
 - state `cat` defaults to `'all'`
 - a grid of PoojaCards with a staggered fade-up animation (60ms × index)
 - **no text search** on this page
- **Pooja categories:**

id	Hindi	English	Poojas
all	सभी पूजाएँ	All	10
dainik	दैनिक उपासना	Daily worship	2
devta	देव पूजन	Deity worship	2
tyohar	पर्व एवं व्रत	Festivals & vows	3
grah	ग्रह शांति	Planet pacification	1
sanskar	संस्कार एवं अनुष्ठान	Rites & rituals	2

Pooja detail page (`/karmkand/pooja-paddhati/{slug}`)

- **Metadata:** title "{name} — सम्पूर्ण विधि" (complete method); description is `short`.
- **Hero:**
 - breadcrumbs: होम › कर्मकांड › पूजा पद्धति
 - H1 name
 - meta: deity, level, duration, step count, category name
 - short description
- **Layout:** a sticky table of contents with 8 links. At widths of 1100px and below it becomes a wrapped row of chips, no longer sticky.
- **Content sections in order:**
 1. **परिचय (Introduction):** the `intro[]` paragraphs (2 per pooja).
 2. **शुभ समय एवं दिशा (Auspicious time & direction):** two fact cards, "कब करें" (when) and "दिशा एवं स्थान" (direction & place), plus a link to `/panchang` for today's tithi, nakshatra and Rahu kaal.
 3. **पूजा सामग्री (Items):** the `SamagriChecklist`. Each `pooja.samagri` entry `[slug, qty]` is joined with `getSamagri(slug)`. If the pooja has `extraSamagri`, an "अन्य आवश्यक वस्तुएँ" (Other required items) box lists those plain-text extras.
 4. **पूजा से पहले की तैयारी (Preparation):** the preparation list.

5. पूजा विधि (Method): `PoojaSteps`.
 6. प्रमुख मंत्र एवं उनका अर्थ (Main mantras & meaning): a `MantraCard` for each mantra.
 7. नियम एवं लाभ (Rules & benefits): two cards, "ध्यान रखने योग्य नियम" (Rules to observe) and "पूजा के लाभ" (Benefits of the pooja).
 8. प्रश्नोत्तर (Q&A): FAQ as `<details>` / `<summary>` accordions.
- **Pager:** previous and next pooja, **wrapping around** (the first pooja's "previous" is the last pooja, and the last pooja's "next" is the first).

SamagriChecklist (client component)

- **localStorage key:** `vedicdhaam-samagri-{slug}`, one key per pooja (e.g. `vedicdhaam-samagri-dainik-pooja`). The value is a JSON object `{ [samagriSlug]: true/false }`.
- Loads after mount in `useEffect`. Every read and write is wrapped in try/catch.
- Header shows "X / N सामग्री तैयार" (X of N items ready), or "✅ सारी सामग्री तैयार है!" (All items ready) when complete. There is also a progress bar.
- **Buttons:**
 - "पुनः आरंभ" (Restart): clears the state and removes the key; disabled when nothing is ticked.
 - "सूची छापें" (Print list): calls `window.print()`.
- **Each item** is a label containing:
 - a checkbox
 - the item emoji and name
 - "मात्रा: {qty}" (Quantity), where quantity is free text such as "1", "थोड़ा" (a little), "21 गाँठें" (21 knots)
 - a "महत्व" (Significance) link to `/karmkand/pooja-samagri#{slug}`, which opens the encyclopedia modal. It uses `stopPropagation` so clicking it does not toggle the checkbox.
- The `extraSamagri` items are **not** part of the checklist.

PoojaSteps (client component): step-by-step mode

- Intro text: "चरणबद्ध पूजा विधि" (Step-by-step pooja method), with a live counter "(X/N पूर्ण)" (X of N done).
- **Timeline.** Each step has:
 - a number button; tapping it toggles done, and a done step shows ✓ (`aria-pressed`)
 - a card with the step title, detail, and an optional mantra block
- **"पूजा मोड आरंभ करें" (Start Pooja Mode)** opens a full-screen overlay (`role="dialog"`, `aria-modal`):
 - a top progress bar with width (current step + 1) / N
 - the pooja name and a close (X) button
 - "चरण i / N" (Step i of N), then the title, detail and mantra in large type with a fade-up animation per step
 - buttons "पिछला" (Previous, disabled on step 1) and "अगला चरण" (Next step); on the last step the button reads "🙏 पूजा सम्पन्न" (Pooja complete) and marks **all** steps done, then closes
 - moving forward with `go(1)` automatically marks the current step done
 - **Keyboard:** Escape closes, ArrowRight goes forward, ArrowLeft goes back
 - **Body scroll is locked** while the overlay is open
- **Step done-state is NOT persisted.** It is React state only and resets on reload.

MantraCard (client component)

- Shows the mantra name, the Sanskrit text (newlines preserved), and "अर्थ —" (Meaning) followed by the Hindi meaning.
- A **copy button** uses `navigator.clipboard.writeText` to copy "{name}\n\n{text}\n\nअर्थ: {meaning}". The label changes to "कॉपी हो गया" (Copied) for 1.8 seconds. If clipboard access fails, it fails silently.

Samagri encyclopedia (/karmkand/pooja-samagri)

- PageHeader: "पूजा सामग्री कोश", eyebrow "कर्मकांड · द्वितीय अंग" (Karmkand, second part).
- SamagriKosh** (client component):
 - Search box** ("सामग्री खोजें... जैसे कलश, तुलसी, दीपक", Search items, e.g. kalash, tulsi, deepak). It does a plain substring match (`includes`) on the item's `name`, its `alt` (other names), or its `significance` text. The query is trimmed, and only Hindi text will match.
 - Category chips**: "सभी (57)" (All) plus the 8 categories with icons.
 - Results** are grouped under category headings (icon, name, description). Each item is a button card showing: emoji, name, "अन्य नाम:" (other names) when present, the significance text, and "पूरी जानकारी पढ़ें >" (Read full details). Each card has `id={slug}`.
 - Empty state**: "{q}" से संबंधित कोई सामग्री नहीं मिली..." (No item found for "{q}").
- Detail modal**: opened by clicking a card, or by a URL hash matching a slug (it also listens for `hashchange`).
 - Header: emoji, name, category, other names.
 - Sections:
 - 🔮 "आध्यात्मिक महत्व" (Spiritual significance)
 - 👉 "प्रयोग की विधि" (How to use)
 - ⚠️ "ध्यान दें" (Note), the tip
 - 📖 "इन पूजाओं में प्रयोग होती है" (Used in these poojas): links to every pooja whose samagri list includes this item, computed from `POOJAS`
 - Closing**: backdrop click, X button, or Escape. Closing clears the hash with `history.replaceState`. Body scroll is locked while open.

Samagri data (lib/karmkand/samagri.js)

- Each item is `{slug, name, category, icon, significance, usage, tip, alt}`, built with a helper `s(...)`.
- All 57 items have a tip. 25 items have alternate names.
- Categories and counts (57 items in total)**:

id	Hindi	English	Co unt	Items (slugs, then Hindi names)
patra	पूजा पात्र	Pooja vessels	10	kalash, thali, panchpatra, deepak, ghanti, shankh, aarti, dhoopdan, lota, chowki: कलश, पूजा थाली, पंचपात्र एवं आचमनी, दीपक, घंटी, शंख, आरती पात्र, धूपदान, ताम्र लोटा, चौकी (पाटा)
tilak	तिलक एवं मंगल द्रव्य	Tilak & auspicious substances	6	roli, haldi, sindoor, akshat, abir, ashtagandh: रोली, हल्दी, सिंदूर, अक्षत, अबीर-गुलाल, अष्टगंध
sugandh	सुगंधित द्रव्य	Fragrances	6	dhoop, agarbatti, kapoor, chandan, itra, guggul

id	Hindi	English	Count	Items (slugs, then Hindi names)
pushp	पुष्प एवं पत्र	Flowers & leaves	8	pushp, belpatra, tulsi, durva, aampatra, paan, kamal, shami
naivedya	नैवेद्य एवं फल	Offerings & fruit	9	panchamrit, phal, mithai, nariyal, supari, laung, panchmeva, gud, panjiri
pavitra	पवित्र द्रव्य	Sacred substances	7	gangajal, ghee, doodh, dahi, shahad, rudraksh, kush
havan	हवन सामग्री	Havan materials	5	havankund, samidha, havansamagri, jau, til
vastra	वस्त्र, सूत्र एवं आसन	Cloth, threads & seats	6	mouli, janeu, lalvastra, chunari, aasan, shringar

- **mouli** (कलावा) appears in the source under the "havan" comment block, but its category field is **vastra**.
- Every samagri slug that a pooja references exists in the encyclopedia.
- **6 items are not used by any pooja**, so their modal shows no "used in" list: thali, dhoopdan, abir, ashtagandh, gud, kush.

Pooja data (lib/karmkand/poojas.js)

- **Shared mantra object M**. Seven mantras are reused across poojas, each with a name, Sanskrit text and Hindi meaning:
 - pavitrikaran ("ॐ अपवित्रः पवित्रो वा...")
 - achaman (Keshavaya, Narayanaya, Madhavaya, Hrishikeshaya)
 - ganesh ("वक्रतुण्ड महाकाय...")
 - deep ("शुभं करोति कल्याणम्...")
 - kshama (prayer for forgiveness, "आवाहनं न जानामि...")
 - kalash ("कलशस्य मुखे विष्णुः...")
 - navgrah (Navagraha stuti, "ब्रह्मा मुरारिस्त्रिपुरान्तकारी...")
- **Helper sankalpStep(purpose)** generates a standard "संकल्प" (vow) step with the purpose inserted into the text. It is used in Ganesh, Lakshmi, Satyanarayan, Havan and Navratri.
- **Pooja object fields:**
 - basics: slug, name, deity, icon, tone, category, level (सरल = Easy | मध्यम = Medium | विस्तृत = Elaborate), duration, short
 - text: intro[], when, direction
 - items: samagri [[slug, qty]], extraSamagri[] (optional)
 - method: preparation[], steps [{title, detail, mantra?}], mantras [{name, text, meaning}]
 - rules[], benefits[], faq [{q, a}]

Full list of the 10 poojas

#	Slug	Name (Hindi)	English	Deity	Category	Level	Duration	Steps	Steps with mantras	Featured mantras	Checklist items	Extra items	Prep	Rules	Benefits	FAQ

#	Slug	Name (Hindi)	English	Deity	Category	Level	Duration	Steps	Steps with mantras	Featured mantras	Checklist items	Extra items	Prep	Rules	Benefits	FAQ
10	griha-pravesh	गृह प्रवेश पूजा	House warming	Vastu Purusha, Ganesh & Navagraha	sanskrit	Elementary	2–3 hrs	10	5	3	23	5	4	4	4	1

Totals: **115 steps**, **32 featured mantra cards** (some mantras repeat across poojas), and 14 FAQs.

Per-pooja purpose, steps and mantras

1. Daily pooja (dainik-pooja)

- **Purpose:** simple everyday home worship using 5 upacharas (gandh, pushp, dhoop, deep, naivedya).
- **When:** morning after bath (brahma muhurta is best), plus lighting a lamp at dusk.
- **Direction:** face east or north; shrine in the north-east.
- **Steps (11):**
 1. Seat & purification
 2. Achaman
 3. Lamp lighting
 4. Ganesh smaran
 5. Gandh (1st upachara)
 6. Pushp (2nd)
 7. Dhoop (3rd)
 8. Deep darshan (4th)
 9. Naivedya (5th)
 10. Prayer & aarti
 11. Prayer for forgiveness
- **Mantra cards:** Pavitrikan, Ganesh smaran, Deep prajvalan, Kshama prarthana.
- **FAQ:** pooja during menstruation; what to do when short of time.

2. Shodashopachar poojan

- **Purpose:** the complete 16-service worship, the basis of all big poojas. It can be used for any deity by swapping the name.
- **Steps (16):** Dhyana, Avahan, Asan, Padya, Arghya, Achaman, Snan (with panchamrit), Vastra, Yajnopavit, Gandh, Pushp, Dhoop, Deep, Naivedya + tambool, Aarti & pradakshina, Pushpanjali & namaskar.
- **Mantra cards:** Pavitrikan, Ganesh, Kalash, Kshama.
- **Rules include:** keep the order; "मनसा परिकल्प्य समर्पयामि" (offer mentally) for missing items; in Shiva pooja, no conch water, turmeric or ketaki.
- **FAQ:** panchopachar vs shodashopachar; can it be done without Sanskrit (yes, in Hindi).

3. Ganesh poojan

- **Purpose:** remove obstacles; done before any new work.

- **When:** Wednesdays and Chaturthi tithis.
- **Steps (10):**
 1. Purification & achaman
 2. Sankalp
 3. Dhyan & avahan
 4. Snan
 5. Cloth, janeu, sindoor
 6. Offering 21 durva with 10 names
 7. Flowers, dhoop, deep
 8. Modak bhog (21)
 9. 108 japa of "ॐ गं गणपतये नमः"
 10. Aarti & forgiveness prayer
- **Mantra cards:** Ganesh smaran, Ganesh mool mantra, Ganesh Gayatri.
- **Rules:** no tulasi; do not look at the moon on Ganesh Chaturthi night; and others.
- **FAQ:** why 21 durva (the Anulasura story).

4. Diwali Lakshmi poojan

- **Purpose:** wealth, prosperity and stable fortune.
- **When:** Kartik Amavasya, during pradosh kaal in the fixed Taurus lagna; also Fridays.
- **Steps (12):**
 1. Purification + akhand diya
 2. Sankalp
 3. Ganesh poojan
 4. Kalash poojan
 5. Lakshmi dhyan & avahan
 6. Snan & shringar
 7. Gandh, flowers, lotus
 8. Dhan poojan (coins, account books with "शुभ-लाभ")
 9. Naivedya
 10. Lakshmi mantra japa 108 (kamalgatta mala)
 11. Deepdaan (11 or 21 lamps)
 12. Aarti & forgiveness prayer
- **Mantra cards:** Mahalakshmi mantra, Lakshmi Gayatri, Kubera mantra.
- **Extras:** idols, silver coins, account book, khil-batashe, kamalgatta mala.

5. Satyanarayan vrat pooja

- **Purpose:** wish fulfilment and gratitude. Based on the Skanda Purana (Reva Khanda). Includes a 5-chapter katha.
- **When:** purnima, ekadashi, sankranti, Thursday.
- **Steps (10):**
 1. Purification + lamp
 2. Sankalp
 3. Ganesh, Gauri, Kalash

4. Navagraha poojan (9 supari)
5. Shodashopachar of Satyanarayan
6. Katha shravan
7. Bhog with tulsi
8. Havan (optional, 108 ahutis)
9. Aarti "ॐ जय लक्ष्मी रमणा"
10. Prasad distribution

- **Mantra cards:** Dwadashakshar ("ॐ नमो भगवते वासुदेवाय"), Vishnu dhyan ("शान्ताकारं..."), Navagraha stuti.
- **FAQ:** can it be done without a pandit (yes).
- **Limitation:** the katha text itself is **not included**. The site only says to read or hear it.

6. Rudrabhishek

- **Purpose:** Shiva's grace. Different abhishek substances for different wishes: milk for health, cane juice for wealth, mustard oil for enemies, water for peace.
- **When:** Shravan, Mahashivratri, Mondays, pradosh.
- **Steps (10):**
 1. Purification & sankalp
 2. Ganesh, Gauri, Nandi
 3. Shiva dhyan
 4. Jalabhishek
 5. Panchamrit abhishek
 6. Special-substance abhishek + Mahamrityunjaya
 7. Shringar
 8. Belpatra & flowers
 9. Dhoop, deep, naivedya
 10. Aarti & half circumambulation
- **Mantra cards:** Panchakshar ("ॐ नमः शिवाय"), Mahamrityunjaya, Shiva Gayatri.
- **Rules:** no turmeric, sindoor, tulsi, ketaki or conch on the Shivling; half parikrama only; nirmalya is not eaten.
- **FAQ:** which Shivling to keep at home (no bigger than a thumb).

7. Navagraha shanti

- **Purpose:** pacify unfavourable planets during a difficult dasha or transit.
- **Direction:** gives the mandala layout by direction.
- **Steps (14):**
 1. Purification & sankalp
 2. Ganesh & kalash
 3. Navagraha avahan 4–12. One step per planet, in the order Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu, Ketu. Each has its bija mantra, e.g. "ॐ हं ह्रीं ह्रौं सः सूर्याय नमः", and its colour, grain and flower.
 4. Navagraha havan
 5. Purnahuti, aarti & daan
- **Mantra cards:** Navagraha stuti, plus the Sun, Moon and Saturn bija mantras with japa counts of 7000, 11000 and 23000.

- **Extras:** the nine grains, coloured cloths.
- **Ties to the course:** this pooja connects to Jyotish Lessons 2 and 12. The FAQ tells users to get their kundli analysed.

8. Havan vidhi

- **Purpose:** a Vedic fire offering to purify the surroundings and the mind.
- **Direction:** havan kund in the south-east; the person performing it faces east.
- **Steps (10):**
 1. Purification
 2. Sankalp
 3. Ganesh & kalash
 4. Lighting the fire ("ॐ अग्निं दूतं...")
 5. Five ghee ahutis with "इदं ... न मम"
 6. Ahutis to deities
 7. Gayatri ahutis (11/21/108)
 8. Mahamrityunjaya ahutis (11)
 9. Purnahuti with a dry coconut ("पूर्णमदः...")
 10. Aarti & shanti path
- **Mantra cards:** Gayatri, Purnamadah.
- **Rules:** use the correct fingers; do not blow on the fire; do not douse it with water; not in a closed room.
- **FAQ:** meaning of "स्वाहा"; how to do havan in a flat.

9. Kalash sthapana & Navratri

- **Purpose:** ghatasthapana on day 1 and nine days of Navadurga worship (Chaitra and Ashwin months).
- **When:** pratipada, abhijit or morning muhurta; avoid Chitra nakshatra and Vaidhriti yoga.
- **Steps (12):**
 1. Purification
 2. Sankalp
 3. Ganesh
 4. Kalash sthapana
 5. Leaves & coconut
 6. Akhand jyoti
 7. Durga avahan & shodashopachar
 8. The day's form (lists all 9 forms)
 9. Durga Saptashati or Navarna japa
 10. Aarti
 11. Kanya poojan (Ashtami/Navami)
 12. Visarjan (Dashami)
- **Mantra cards:** Navarna ("ॐ ऐं ह्रीं क्लीं चामुण्डायै विच्चे"), Sarvamangal, Ya Devi Sarvabhuteshu.
- **FAQ:** what to do if the akhand jyoti goes out.

10. Griha pravesha

- **Purpose:** remove vastu defects and invite prosperity into a new home. Names 3 types of entry: apurva, sapurva, dvandva.

- **When:** the muhurta lists auspicious months and nakshatras, and excludes chaturmas, kharms and holashtak.
- **Steps (10):**
 1. Door poojan
 2. Auspicious entry (right foot first)
 3. Purification & sankalp
 4. Ganesh & kalash
 5. Navagraha
 6. Vastu Purusha poojan
 7. Vastu shanti havan
 8. Boiling milk
 9. Sprinkling kalash water
 10. Aarti, feast, daan
- **Mantra cards:** Vastu Purusha mantra, Navagraha stuti, Ganesh smaran.
- **FAQ:** pooja for a rented house.

Limitations: Section B

- **Hindi only.** No English or transliteration of mantras, even though the site is bilingual.
- **Only 10 poojas.** Several popular ones are missing (e.g. Hanuman, Shani, Karva Chauth, Janmashtami, Shraddha), although some are mentioned in the samagri text.
- **The Satyanarayan katha text is not provided.** Aarti lyrics are referenced by their first line only.
- **No audio** for mantras (no pronunciation help). Mantra cards offer only copy-to-clipboard, which fails silently if the clipboard is blocked.
- **Step progress in Pooja Mode is not saved.** Reloading loses it. Only the samagri checklist persists.
- **Checklist storage:** per pooja, in localStorage, on that device only; not synced to any account.
- **Print is a plain `window.print()`.** No `@media print` CSS was found in `karmkand.module.css`, so the whole page (header, other sections) prints rather than just the list.
- **The pooja list has no text search.** It has only category chips.
- **The samagri search is a simple substring match:**
 - Hindi text only, so English or Latin input such as "kalash" will not match names
 - it does not search the `usage` or `tip` text
 - no fuzzy matching
- **The extra-items list is plain text.** It is not linked to the encyclopedia and is not in the checklist.
- **6 encyclopedia items are used by no pooja:** thali, dhoopdan, abir, ashtagandh, gud, kush.
- **No date-aware muhurta.** "When" is generic text. Users are pointed to `/panchang` for the daily details.
- **Content is hard-coded in JS,** so any change requires a redeploy.

CHAPTER 5

Manobal — Mind, Career & Life Guidance

मनोबल — मन, करियर एवं जीवन मार्गदर्शन

All text in the section is bilingual: every string is an `{ en, hi }` object rendered through `t()` from `useLang()` (lib/i18n). In Hindi mode, chapter numbers, section numbers, minutes and step numbers are shown in Devanagari digits (०१२...).

1. URL routes

Route	File	What it is
<code>/manobal</code>	<code>app/manobal/page.js</code> → <code>ManobalHub.js</code>	Hub / landing page
<code>/manobal/self-check</code>	<code>app/manobal/self-check/page.js</code> → <code>SubPage kind="self-check"</code>	GAD-7 / PHQ-9 screening
<code>/manobal/career-compass</code>	<code>app/manobal/career-compass/page.js</code> → <code>SubPage kind="career"</code>	Career Compass (RIASEC + 10th house)
<code>/manobal/[slug]</code>	<code>app/manobal/[slug]/page.js</code> → <code>ChapterView.js</code>	One of the 12 chapters

- Chapter pages are statically generated: `generateStaticParams()` returns the 12 chapter slugs. An unknown slug calls `notFound()` (404).
- `self-check` and `career-compass` are their own folders, so Next.js serves them in place of the `[slug]` route.
- Page metadata:
 - Hub: title "मनोबल — मन, करियर एवं जीवन मार्गदर्शन · Manobal: Mind, Career & Life Guidance"; description: "Chapter-wise guidance for students and people of all ages dealing with stress, anxiety and low mood — breathing, CBT tools, sleep, exam stress, and astrology-based career guidance, in Hindi and English."
 - Self-check: title "स्व-जाँच · Confidential Self-Check (GAD-7, PHQ-9)"; description says "...Nothing is saved."
 - Career compass: title "करियर कम्पास · Career Compass — Interests + Kundli"; description "...combining an interest profile (RIASEC) with your Vedic birth chart's 10th house."
 - Chapter: title "<Hindi title> · <English title> – मनोबल", description "<Hindi subtitle> | <English subtitle>".
- Links into Manobal from elsewhere: `lib/nav.js` menu (`/manobal` "Mind & Career Guidance", `/manobal/man-ko-samjhen` "Start the 12 chapters", `/manobal/career-compass`, `/manobal/self-check` "Anxiety & Mood Self-Check"); the home page (`components/home/ManobalSection.js` and `HomeClient.js`) links to the hub, `#chapters`, `#toolkit`, self-check, career compass and several chapters.

2. Hub page (`/manobal`, `ManobalHub.js`) — layout top to bottom

1. Hero

- Kicker "Manobal · मनोबल". Heading "A calmer mind, a clearer path" (शांत मन, स्पष्ट मार्ग).

- Lead: "Chapter-by-chapter guidance to train your mind, handle stress, anxiety and low mood, and find your career direction — with proven psychology and the wisdom of Vedic astrology."
- Main button: "Start Chapter 1" if no chapter is done yet, otherwise "Continue learning". It links to the first chapter not yet marked complete (falls back to chapter 1).
- Second button: "Free self-check" → </manobal/self-check>.
- Stats: **12** chapters, **7** interactive tools, **100%** private.
- Art: a "breathing" orb with a 🧘 emoji (CSS keyframe `breathe`, 8 s loop, scaling 0.94 ↔ 1.06), two rings and four floating emojis 🌿 🌻 🌙 ✨ (6 s float animation).

2. **Compact help banner** (see section 7).

3. **Quick finder — "What are you going through?"** ("Start where you are"). Nine chips:

- 📖 Exam stress → </manobal/pariksha-ka-tanav> (Ch 7)
- 🌀 Overthinking → </manobal/vicharon-ko-pehchanen> (Ch 3)
- 😰 Panic / anxiety → </manobal/chinta-se-mukti> (Ch 4)
- 😞 Feeling low or empty → </manobal/udasi-se-bahar> (Ch 5)
- 🌙 Can't sleep → </manobal/neend-aur-dinacharya> (Ch 6)
- 🧭 Career confusion → </manobal/career-compass> (the tool, not Ch 8)
- 🏠 Family conflict → </manobal/sambandh-aur-samvad> (Ch 9)
- 🌿 Worried about Sade Sati → </manobal/grah-aur-man> (Ch 10)
- 🧘 Need to calm down now → [#toolkit](#) (same page)

4. **Three pillars:** "Train your mind" (neuroplasticity, "neurons that fire together, wire together"); "Astrological guidance" (Moon sign for nature, 10th house for career — "a lens for self-knowledge, not a verdict"); "Better daily life" (sleep, routine, study habits, relationships — psychology + Ayurvedic दिनचर्या).

5. **"Who is Manobal for?"** four cards: 🎓 Students (exam pressure, focus, comparison, choosing a stream/career); 💼 Young professionals (work stress, burnout, direction, relationships, self-doubt); 👨👩👧👦 Parents & families (supporting children, conflict, understanding each other); 🌿 Every age (loneliness, worry, low mood, sleep, peace).

6. **Neuroplasticity journey** — "Rewiring the brain takes weeks, not days". Note: "Research on habit formation suggests a new habit takes about two months of regular practice on average." Four steps: Week 1–2 Notice; Week 3–5 Practise; Week 6–9 Strengthen; Week 10+ Live it.

7. **Chapters grid** (`id="chapters"`) — "12 chapters to a stronger mind", with a **progress bar** "Your progress: N%" = chapters marked complete ÷ 12. Each card shows number (or a ✓ tick when done), icon, title, subtitle, minutes and audience, coloured by the chapter's "tone".

8. **Toolkit** (`id="toolkit"`) — "Practise right here, right now"; note "Everything you write stays private on your own device." Six tabs (default Breathe): 🧘 Breathe, 🙌 Ground, 📖 Thought journal, 😊 Mood tracker, ⌚ Focus timer, 🙏 Gratitude. The tab panel renders `PracticeTool`. (The 7th tool, Career Compass, has its own page, which explains the "7 interactive tools" stat.)

9. **Feature cards:** 🧭 Career Compass ("An 18-question interest profile combined with your Kundli's 10th house...") → </manobal/career-compass>; 🔒 Confidential Self-Check ("GAD-7 for anxiety, PHQ-9 for mood... Nothing is saved.") → </manobal/self-check>; 💬 Talk to a counsellor ("Book a one-on-one session for career guidance or life problems with an experienced counsellor-astrologer, in Hindi or English") → </contact>.

10. **Full help banner.**

Sub-pages (SubPage.js) for self-check and career: breadcrumb Home > Manobal > page title, heading and lead text, compact help banner, then the tool in a panel. The career page also has a full help banner below. (The self-

check result screen includes its own full help banner.)

- Self-check lead: "Two short questionnaires used by doctors worldwide help you understand how anxiety or low mood may be affecting you, and what to do next."
- Career lead: "Discover what naturally interests you, then see what your birth chart's 10th house (Karma Bhava) suggests. Together they point to directions worth exploring."

3. Chapter page (ChapterView.js) — structure and data fields

Data fields of every chapter object (lib/manobal/chapters/part1–3.js)

- `slug`, `number`, `icon` (emoji), `tone` (colour theme: teal, green, violet, saffron, indigo, rose), `minutes` (reading time), `audience` {en,hi}, `title` {en,hi}, `subtitle` {en,hi}, `intro` {en,hi}
- `sections[]` — each has `heading` plus any of: `paragraphs[]`, `points[]` (bullet list), `table` {columns[], rows[] []}, `example` (shown in an "Example" box), `tip` (shown in a "Remember" box)
- `astro` — `heading`, `paragraphs[]`, optional `mantra` {text (Devanagari, not translated), meaning {en,hi}} — shown as the "Astrological view" block
- `practice` — `tool` (key of an interactive tool, or `null`), `title`, `steps[]`
- `reflect[]` — 3 reflection questions, each with its own textarea
- `summary[]` — "Key takeaways" bullets
- `chapters/index.js` exports `CHAPTERS` (all 12), `getChapter(slug)`, `CHAPTER_CARDS` (card fields only: slug, number, icon, tone, title, subtitle, minutes, audience) and `TOTAL_MINUTES` (sum of minutes = 181; exported but not used anywhere in the Manobal pages).

Page layout

1. Hero: breadcrumb Home > Manobal > Chapter N; icon; "Chapter N of 12"; title; subtitle; meta line (🕒 N min read, 👥 audience, plus a "Completed" badge when done).
2. Compact help banner.
3. Two-column layout: a sticky **"In this chapter"** table of contents on the left (links to each section, then Astrological view, Practice, Reflect, Summary), content on the right. (Sticky TOC collapses at narrower widths; chapter CSS breakpoints are 1000px and 640px.)
4. Intro paragraph → numbered sections → Astrological view block (with mantra box) → Practice block ("Practice — train your neurons", numbered steps, and the embedded interactive tool if `practice.tool` is set) → "Reflect & write" → "Key takeaways" with a **Mark chapter complete** toggle button ("Completed — mark as not done" when done).
5. Pager: previous/next chapter (chapter 1 shows "Back to All chapters"; chapter 12 shows "Course complete — Back to Manobal").
6. Full help banner.

Saved data on chapter pages

- **Progress:** localStorage key `vedicdhaam-manobal-progress` = JSON array of completed chapter slugs. The button adds/removes the current slug. The hub reads the same key for the progress % and the "Continue learning" target.

- Astro: Budh (Mercury) — planet of intellect; CBT as strengthening your inner Budh. Mantra: ॐ बुं बुधाय नमः॥
- Practice: "Thought record — challenge one thought today". **Tool:** **thought-record**.
- Reflect: which trap most often; a harsh thing I say to myself; a balanced replacement thought.

Ch 4 — **chinta-se-mukti** — चिंता से मुक्ति / Freedom from Anxiety 🌿

- Tone teal · 15 min · All ages. Subtitle: "Understanding panic, grounding yourself and facing fears".
- Teaches: body signs of anxiety; panic attacks — frightening but not dangerous, usually peak within about 10 minutes and pass (tip: first-time chest pain or heart problems → see a doctor); 5-4-3-2-1 grounding; "worry time" (15 minutes at a fixed time daily, not near bedtime); facing fears with a "fear ladder" (speaking-in-class example, 5 steps; stay until anxiety drops by about half); reducing reassurance-seeking (delay checking by 10, then 20 minutes).
- Astro: Rahu and restlessness — handled by discipline, routine, grounding. Mantra: Mahamrityunjaya mantra (ॐ त्र्यम्बकं यजामहे...).
- Practice: "Guided 5-4-3-2-1 grounding". **Tool:** **grounding**.
- Reflect: where I feel anxiety first in my body; what I avoid / first step of my fear ladder; my daily worry time.

Ch 5 — **udasi-se-bahar** — उदासी से बाहर / Rising Out of Low Mood 🌅

- Tone saffron · 16 min · All ages. Subtitle: "Small actions that lift the heaviness of depression".
- Teaches: the low-mood cycle (doing less → feeling lower; it also works in reverse); behavioural activation — start tiny (5 min sunlight, 10-min walk, shower, one message, water a plant...); pleasure and mastery activities ("Amit, 45" job-loss example, back at satsang by week three); self-compassion (hand-on-heart phrase; "I'm unwell and doing my best"); supporting a loved one; red flags — see a professional if low mood lasts over two weeks, affects work/studies, or there are self-harm thoughts; "Depression is treatable." Tip: "This course supports wellbeing; it does not replace diagnosis or treatment by a qualified professional."
- Astro: Sun, Moon and Guru — light, mind and hope; सूर्य अर्घ्य (also gives morning sunlight). Mantra: ॐ घृणि सूर्याय नमः॥
- Practice: "Mood & activity tracker" (rate mood 1–5 each evening, note a pleasure + mastery activity, review after a week). **Tool:** **mood**.
- Reflect: what I enjoyed before; smallest step tomorrow morning; one person to reach out to.

Ch 6 — **neend-aur-dinacharya** — नींद और दिनचर्या / Sleep & Daily Routine 🌙

- Tone indigo · 13 min · All ages. Subtitle: "The foundation of a steady mind".
- Teaches: sleep-needs table (6–12 yrs 9–12 h; 13–18 yrs 8–10 h; adults 7–9 h; 65+ 7–8 h); sleep hygiene (fixed wake time, morning sun within an hour, no screens 30–60 min before bed, no tea/coffee/cola after 2–3 pm, cool dark room, get up if not asleep in 20 min, naps under 30 min and before 3 pm); wind-down routine; Ayurvedic दिनचर्या (Brahma Muhurta ≈ 1.5 h before sunrise, सूर्य दर्शन, largest meal at midday, sleep by ~10 pm, पादाभ्यंग foot massage; tip: shift wake time 15 min earlier per week); movement and food (30-min brisk walk 5 days a week).
- Astro: living with the Sun (day) and Moon (night); सूर्य अर्घ्य and संध्या दीप as anchors. **No mantra.**
- Practice: "My 7-day routine challenge" (5 steps: fixed wake time, 10 min sunlight, screens off 45 min before bed, no tea/coffee after 2 pm, three good things before sleep). **Tool:** **none**.
- Reflect: actual hours slept; what keeps me awake; one habit to start tonight.

Ch 7 — pariksha-ka-tanav — परीक्षा का तनाव / Beating Exam Stress 📅

- Tone saffron · 17 min · Students & parents. Subtitle: "Study smarter, handle pressure, and bounce back from results".
- Teaches: why stress blocks memory (tip: three slow out-breaths before opening the paper); Pomodoro (25 min focus / 5 min break, longer 15–30 min break after four rounds); study methods table (Active recall, Spaced revision 1 day/3 days/1 week/1 month, Practice tests, Teach it, Mix topics; re-reading and highlighting called weak); comparison and social media ("Sharma ji ka beta got 98%"); talking to parents; results, failure and bouncing back (tip: if you feel you can't face the result or life, talk to a parent, teacher or helpline immediately); "For parents" list (praise effort, avoid comparisons, protect sleep/meals, "We love you whatever the result", watch for withdrawal).
- Astro: Budh, Guru and the 5th house (4th house = schooling); Maa Saraswati. Mantra: ॐ ऐं सरस्वत्यै नमः॥ (chant 11 times before study).
- Practice: "Pomodoro focus timer". **Tool:** focus-timer .
- Reflect: what worries me most about exams; which method instead of re-reading; what I'd tell a younger student who failed.

Ch 8 — career-ki-disha — करियर की दिशा / Finding Your Career Direction 🧭

- Tone violet · 18 min · Students & professionals. Subtitle: "Know yourself, explore options, and see what your chart suggests".
- Teaches: Step 1 Know yourself (interests, strengths, values, work style); Step 2 RIASEC six types (John Holland) table with "enjoys" and example careers; Step 3 how Vedic astrology views career — 10th house (कर्म भाव), its lord (दशमेश), planets in/aspecting it, D10 (दशमांश), 2nd/6th/11th houses, Mahadasha timing — plus a planet→career-fields table for all 9 grahas; "Astrology is one lens — not the only one" (Gita "कर्मण्येवाधिकारस्ते"; tip: get your free Kundli on VedicDhaam, then discuss with an astrologer and a career counsellor); Step 4 explore before you decide (talk to 3 people in the field, short course/internship, job shadowing, career journal); handling confusion and family pressure.
- Astro block: "A simple ritual for career clarity" — Thursday (गुरुवार), offering water to the Sun. Mantra: ॐ बृं बृहस्पतये नमः॥
- Practice: "Career interest quiz (RIASEC)". **Tool:** career (the full Career Compass is embedded in the chapter).
- Reflect: what work I'd choose if money/opinions didn't matter; three careers that excite me; one person to talk to this month.

Ch 9 — sambandh-aur-samvad — संबंध और संवाद / Relationships & Communication 💡

- Tone rose · 15 min · All ages. Subtitle: "Family, friends, loneliness and asking for help".
- Teaches: "I" statements (formula "I feel ___ when ___ because . ***I would like*** ", Mummy/Didi example); active listening; healthy boundaries (3 example sentences); loneliness; breakups and loss; peer pressure; bullying and online harassment — save screenshots, block and report, tell a trusted adult/teacher/HR; **in India report cyber harassment at cybercrime.gov.in or national helpline 1930.**
- Astro: Venus, the 7th house and harmony (4th = mother/home, 7th = partnerships, 11th = friends; Mars/Saturn linked with friction). Mantra: ॐ शुं शुक्राय नमः॥
- Practice: "One conversation this week". **Tool:** none.
- Reflect: which relationship needs care; where to set a boundary; who I can call when things are hard.

Ch 10 — **grah-aur-man** — ग्रह और मन / The Planets & the Mind 🌟

- Tone indigo · 16 min · All ages. Subtitle: "What Jyotish says about emotions — and calming remedies".
- Teaches: Chandra = the mind (Moon sign as emotional nature; Purnima/Amavasya); Budh = intellect and nerves; Shani — Sade Sati (~7½ years, Saturn transiting the signs before, on and after the Moon sign) and Dhainya (2½ years, Saturn in 4th or 8th from Moon) framed as "a season, not a sentence"; Rahu & Ketu (restlessness and detachment); Guru (hope and wisdom); supportive remedies (उपाय) table for Moon, Mercury, Saturn (ॐ शं शनैश्चराय नमः; Hanuman Chalisa on Saturdays), Rahu/Ketu, Jupiter. Remedies "complement — but never replace — medical care or therapy". Tip: "Be cautious of anyone who creates fear or demands large sums for remedies."
- Astro block: universal mantras for a peaceful mind. Mantra: Gayatri mantra (ॐ भूर्भुवः स्वः...).
- Practice: "Know your Moon" (generate free Kundli on VedicDhaam, note Moon sign and Nakshatra, read the Zodiac section, practise one remedy for 21 days). **Tool: none.**
- Reflect: which planet felt like me; have I feared an astrological period; which calming ritual to add.

Ch 11 — **dhyan-aur-kritagyata** — ध्यान और कृतज्ञता / Meditation & Gratitude 🌸

- Tone green · 14 min · All ages. Subtitle: "Training attention, kindness and contentment".
- Teaches: simple 5-minute meditation (notice wandering, say "thinking", return — each return is a "rep"); body scan (similar to योग निद्रा); mantra japa as a focus anchor (Om, Gayatri, इष्ट mantra, 108-bead mala); science of gratitude (negativity bias; three good things a day; be specific; thank someone weekly); digital detox (no phone first 30 min after waking, turn off notifications, phone-free meals, one screen-free evening weekly — try एकादशी or Sunday).
- Astro: meditation and the 12th house; Ketu and Jupiter; best time ब्रह्म मुहूर्त or संध्या. Mantra: ॐ शान्तिः शान्तिः शान्तिः॥
- Practice: "Gratitude journal" (three specific good things nightly, why it mattered, 21 days). **Tool: gratitude.**
- Reflect: a small good thing I overlook; when I can sit quietly 5 minutes; who deserves a thank-you.

Ch 12 — **jeevan-path** — जीवन पथ / Your Path Forward 🌄

- Tone saffron · 15 min · All ages. Subtitle: "Build your personal wellbeing plan and keep growing".
- Teaches: personal wellbeing plan table (Daily anchors, My early warning signs, What helps me, People I can call, Professional help); SMART goals (Specific, Measurable, Achievable, Relevant, Time-bound); setbacks are part of the path (tip: "Missing one day doesn't break a habit. Missing the restart does."); celebrate progress; keep learning and getting support (astrologer consultation "alongside, not instead of, professional mental health care").
- Astro: Karma and free will (पुरुषार्थ). Mantra: Bhagavad Gita 6.5 (उद्धरेदात्मनात्मानं...) — "Lift yourself by your own self...".
- Practice: "Write your plan today" (fill the five parts, one SMART goal for 30 days, save a helpline number and share the plan with one trusted person). **Tool: none.**
- Reflect: my three daily anchors; my warning signs and what I'll do; the change I'm most proud of.

Tool links summary: Ch2 breathing · Ch3 thought-record · Ch4 grounding · Ch5 mood · Ch7 focus-timer · Ch8 career · Ch11 gratitude. Chapters 1, 6, 9, 10, 12 have written practice steps only (**tool: null**).

5. Interactive tools (components/manobal)

`PracticeTool.js` maps a key to a component: `breathing` → BreathingTool, `grounding` → GroundingTool, `thought-record` → ThoughtRecord, `mood` → MoodTracker, `focus-timer` → FocusTimer, `gratitude` → GratitudeJournal, `career` → CareerCompass. An unknown key renders nothing.

Saving uses `useStoredState(key, initial)` (lib/useStoredState.js): React state that is loaded from localStorage after the page mounts and written back to localStorage (as JSON) on every change. Errors (e.g. storage blocked) are silently ignored. `todayKey()` gives the local date as `YYYY-MM-DD`.

5.1 Breathing (BreathingTool.js) — nothing saved

- Four patterns (buttons), default **Box**:
 - **Box breathing**: in 4 s, hold 4, out 4, rest 4 (16 s cycle). Note: "Equal counts. Great before exams or interviews."
 - **4-7-8 relaxing**: in 4, hold 7, out 8 (19 s). "Long exhale switches on the body's calming system. Helpful before sleep."
 - **Calm 4-6**: in 4, out 6 (10 s). "Simple and gentle. Use any time anxiety rises."
 - **Bhramari (humming bee)**: in 4, hum 8 (12 s). "Close your ears with thumbs and hum 'mmm' while exhaling."
- How it works: one 1-second timer counts elapsed seconds; the current phase, the countdown number and the **Rounds** counter (completed cycles) are all worked out from that number. A circle grows to full size on "Breathe in", stays full on "Hold", and shrinks (to 0.62) on breathe out / rest / hum, animated over the length of the phase. Labels: Breathe in / Hold / Breathe out / Rest / "Hum out... mmm". Idle shows "Ready" and "—".
- Controls: Start/Pause, Reset. Changing pattern resets the timer.
- Caution text: "Breathe gently through the nose. If you feel dizzy, stop and breathe normally. Skip breath-holding if you are pregnant or have heart or lung conditions."

5.2 Grounding 5-4-3-2-1 (GroundingTool.js) — nothing saved

- Five steps shown one at a time with progress dots (5,4,3,2,1): name **5** things you can SEE (e.g. clock, plant, wall colour), **4** you can TOUCH, **3** sounds you can HEAR, **2** things you can SMELL (e.g. incense, soap, tea), **1** thing you can TASTE. Each step shows the matching number of text boxes. Back / Next / Finish buttons. No timer.
- End screen: "Well done. You are here, in this moment." + "Notice your breath and your feet on the ground. Anxiety rises like a wave and always falls again." and a "Do it again" button (clears all answers). Answers live only in page memory.

5.3 Thought Record / Thought journal (ThoughtRecord.js) — CBT form

- Fields: 1 Situation; 2 Automatic thought (required — Save is disabled until filled); 3 Emotion + Intensity slider (0–100%, step 5, default 70); 4 Thinking trap dropdown (same 10 traps as Ch 3); 5a Evidence FOR ("Facts only, not feelings"); 5b Evidence AGAINST; 6 Balanced thought ("what would a wise friend say?"); 7 Intensity now slider (default 40).
- "Save to my journal" adds the entry (with `id` = timestamp and ISO `date`) to the top of the list; the list keeps at most **50** entries. Confirmation "✓ Saved on this device" for 2.5 s.

- History: "My recent entries (private, on this device)" shows the latest 5 — date, the old thought struck through, "→ balanced thought", "emotion before% → after%", and a delete (bin) button.
- **localStorage key:** `vedicdhaam-manobal-thoughts` (JSON array).

5.4 Mood tracker (MoodTracker.js)

- "How are you feeling today?" — 5 moods: 1 😞 Very low, 2 😓 Low, 3 😐 Okay, 4 😊 Good, 5 😄 Great.
- 8 toggle tags: Slept well, Exercise/Yoga, Study/Work, Family time, Friends, Prayer/Meditation, Too much screen, Stressful day. Optional one-line note.
- Saved automatically on every click/keystroke under today's date.
- 14-day bar chart (bar height = mood/5, coloured by mood; hover shows date and value). Text: "Average over N logged days: X.X / 5" or "Log your mood daily to see your pattern here."
- **Low-mood alert:** if the most recent days (counting back from today, today included) have 5 or more consecutive logged days with mood ≤ 2 , it shows: "Your mood has been low for N days in a row. This is a good time to talk to someone you trust or a professional. Tele-MANAS: 14416 (free, 24×7)."
- **localStorage key:** `vedicdhaam-manobal-mood` = `{ "YYYY-MM-DD": { mood, tags[], note } }`.

5.5 Focus timer / Pomodoro (FocusTimer.js)

- Presets: **25/5** (default), **50/10**, **15/3** minutes (focus/break).
- Circular countdown ring (amber for Focus, teal for Break) showing MM:SS. Uses an end-time timestamp checked every 250 ms, so it stays accurate even if the tab is slowed.
- When a phase reaches 0: plays a three-note chime (Web Audio; 523, 659, 784 Hz), **stops**, switches to the other mode and loads its length (the user presses Start again). Finishing a **focus** phase adds 1 to today's session count.
- Controls: Start/Pause, Reset (back to focus at full length), Skip (switch mode without counting a session). "Sessions today: N".
- Tip: "Keep your phone in another room. In breaks, stand up, stretch, drink water and look far away — not at a screen."
- **localStorage key:** `vedicdhaam-manobal-focus` = `{ "YYYY-MM-DD": count }`.

5.6 Gratitude journal (GratitudeJournal.js)

- Three prompts: "Something small that made me smile today...", "A person I am thankful for, and why...", "Something about myself I appreciate..."
- Saves when a field loses focus and with "Save today's gratitude" (button disabled while all three are empty). Reloads today's entry if it exists.
- Streak "🔥 N-day gratitude streak": consecutive days with at least one non-empty item, ending today (or yesterday if today has no entry yet).
- "Earlier days": the 3 most recent previous days with their items.
- **localStorage key:** `vedicdhaam-manobal-gratitude` = `{ "YYYY-MM-DD": [item1, item2, item3] }`.

5.7 Career Compass — see section 6.

6. Career Compass (components/manobal/CareerCompass.js +

Based on Holland's RIASEC interest model plus Vedic 10th-house (कर्म भाव) indicators. **Nothing is saved.**

Part 1 — Your interests (required)

- 18 statements, 3 per type, each answered on a 4-point scale: Not me = 0, A little = 1, Mostly = 2, Very much me = 3. A progress bar shows answered/18. The result button is disabled until all 18 are answered ("Answer all 18 statements to continue.").
- Statements:
 - R: I enjoy fixing or building things with my hands. / I prefer being outdoors or active over sitting at a desk. / I like understanding how machines or gadgets work.
 - I: I enjoy solving maths, science or logic puzzles. / I often ask "why?" and like to research answers. / I can spend hours learning a topic deeply.
 - A: I love drawing, writing, music or acting. / I like to do things in my own original way. / I notice colours, design and beauty around me.
 - S: Friends come to me when they need to talk. / I enjoy teaching or explaining things to others. / Helping people makes me feel truly happy.
 - E: I like taking charge and leading a group. / I can convince people and enjoy debates. / I dream of starting my own business someday.
 - C: I like keeping things neat, planned and organised. / I am comfortable working with numbers and details. / I prefer clear rules and step-by-step instructions.

Part 2 — Birth chart (optional)

- Date of birth, time of birth, place of birth (dropdown from the shared **CITIES** list in lib/panchang.js: New Delhi (default), Mumbai, Kolkata, Chennai, Bengaluru, Hyderabad, Ahmedabad, Pune, Jaipur, Lucknow, Varanasi, Ujjain, Patna, Kathmandu, Dubai, London). "Birth time makes this far more accurate."
- If no time is given, 12:00 noon is used and the result says "Birth time was not given, so noon was used; houses may shift."

How the result is computed

1. Interest score per type = sum of its 3 answers (0–9). Types are sorted high→low ("ranked").
2. If a birth date is given, a Kundli is built in the browser with **buildKundli** (lib/kundli) for that date/time/city. The 10th sign = 9 signs after the Lagna sign (whole-sign houses). Its lord comes from **SIGN_LORD** (Aries→Pisces: Mars, Venus, Mercury, Moon, Sun, Mercury, Venus, Mars, Jupiter, Saturn, Saturn, Jupiter). Planets with **house === 10** are the occupants.
3. Astro boost: for the 10th lord and for each planet in the 10th house, its two linked RIASEC types get **+1.5** (first type) and **+0.75** (second type). Planet → types: Sun E,I · Moon S,A · Mars R,E · Mercury C,I · Jupiter S,C · Venus A,E · Saturn C,R · Rahu I,E · Ketu I,R.
4. The boosted scores are re-sorted ("blended"); the **top 3 blended types** are highlighted and shown as "Best-fit directions". Without a birth date, blended = interest-only.

Result screen

- Bars for all six types showing the **interest-only** score out of 9; the top-3 (blended) rows are highlighted.

- If chart data: "What your 10th house (Karma Bhava) says" — 10th house sign and lord; " sits in house N — " (from **LORD_IN_HOUSE**, 12 short meanings, e.g. 1 = "Self-made career; your personality is your brand", 10 = "Strong career focus; authority and recognition in your field", 12 = "Foreign lands, MNCs, hospitals, spiritual or behind-the-scenes work"); fields linked to the lord; each planet in the 10th with its fields, or "No planet occupies the 10th house — its lord becomes the main guide."
- Graha career fields (**GRAHA_CAREERS**): Sun — government, administration, politics, leadership, medicine; Moon — hospitality, nursing, food, dairy, PR, psychology; Mars — defence, police, engineering, surgery, sports, real estate; Mercury — commerce, accounts, IT, writing, media, communication, trade; Jupiter — teaching, law, finance, banking, counselling, spiritual guidance; Venus — arts, design, fashion, film, music, beauty, luxury, hospitality; Saturn — research, judiciary, mining, labour-intensive industry, long-term public service; Rahu — technology, foreign lands, aviation, research, unconventional/new-age fields; Ketu — coding, research, spirituality, alternative healing, deep technical skills.
- Best-fit cards for the top 3 types with description and career tags. The six categories:
 - **R Realistic — the Doer** 🛠️: Engineering, Architecture, Agriculture & food tech, Defence & police, Sports & fitness, Aviation, Electrician / mechanic trades
 - **I Investigative — the Thinker** 🧠: Medicine & pharmacy, Scientific research, Data science & AI, Software development, Psychology, Economics, Astronomy & Jyotish research
 - **A Artistic — the Creator** 🎨: Design (graphic, fashion, interior), Writing & journalism, Music & performing arts, Film & animation, Photography, Advertising & content creation
 - **S Social — the Helper** 🤝: Teaching & education, Counselling & psychology, Nursing & healthcare, Social work & NGOs, Human resources, Yoga & wellness coaching
 - **E Enterprising — the Leader** 🚀: Entrepreneurship & business, Management (MBA), Law & advocacy, Civil services & politics, Sales & marketing, Event & hospitality management
 - **C Conventional — the Organiser** 📁: Chartered accountancy & finance, Banking, Government exams (SSC, banking), Actuarial science, Company secretary, Logistics & operations
- Caution: "Use this as a starting point for exploration, not a final verdict. Talk to teachers, try internships and short courses, and follow what genuinely excites you. A chart shows tendencies; your effort (कर्म) shapes the result."
- Buttons: "Discuss with a career astrologer" → </astrologers?focus=career>; "Edit answers" (returns to the form with answers kept).

7. Self-Check screening (components/manobal/SelfCheck.js + lib/manobal/screening.js)

- Two questionnaires as tabs (default GAD-7): **Anxiety check (GAD-7)** 🧠 — 7 questions; **Mood check (PHQ-9)** 🌧️ — 9 questions. Credit line: "Questionnaires: PHQ-9 and GAD-7, developed by Drs. Spitzer, Williams, Kroenke and colleagues." (Code comment: free to use, no permission required; they screen, they do not diagnose.)
 - Intro: "Over the last 2 weeks, how often have you been bothered by the following?"
 - Answer options for every question: Not at all = 0, Several days = 1, More than half the days = 2, Nearly every day = 3.
 - "See my result" is disabled until every question is answered. Switching tabs clears answers.
-

- GAD-7 items: nervous/anxious/on edge; can't stop or control worrying; worrying too much about different things; trouble relaxing; so restless it's hard to sit still; easily annoyed or irritable; afraid as if something awful might happen.
- PHQ-9 items: little interest or pleasure; down/depressed/hopeless; sleep trouble or sleeping too much; tired/little energy; poor appetite or overeating; feeling bad about yourself/failure; trouble concentrating; moving/speaking slowly or being restless; **thoughts that you would be better off dead or of hurting yourself** (item 9).

Scoring bands and result messages

Score = sum of answers. Shown on a half-circle gauge as "score / max" (21 for GAD-7, 27 for PHQ-9), coloured by level (minimal teal, mild yellow, moderate orange, severe red).

GAD-7 (0–21)

- 0–4 **Minimal anxiety** — "Your answers suggest little anxiety right now. Keep up healthy routines like breathing practice, sleep and movement."
- 5–9 **Mild anxiety** — "Some anxiety symptoms are present. The breathing, grounding and thought-journal tools in Manobal can help. Watch how you feel over the next few weeks."
- 10–14 **Moderate anxiety** — "Anxiety seems to be affecting your daily life. Talking to a counsellor or doctor is recommended — therapy for anxiety works very well."
- 15–21 **Severe anxiety** — "Your answers suggest significant anxiety. Please reach out to a mental health professional soon. You can call Tele-MANAS (14416) for free guidance today."

PHQ-9 (0–27)

- 0–4 **Minimal symptoms** — "Your answers suggest few symptoms of low mood right now. Keep nurturing sleep, connection and activities you enjoy."
- 5–9 **Mild symptoms** — "Some low-mood symptoms are present. Try the mood tracker and small daily actions from Chapter 5. If it continues beyond a few weeks, talk to someone."
- 10–14 **Moderate symptoms** — "Low mood seems to be affecting your life. Please consider speaking with a counsellor, psychologist or doctor — depression is common and treatable."
- 15–19 **Moderately severe symptoms** (red colour) — "Your answers suggest significant depression symptoms. Please see a mental health professional soon. Tele-MANAS (14416) can guide you for free."
- 20–27 **Severe symptoms** — "Your answers suggest severe depression symptoms. Please reach out to a doctor or mental health professional as soon as possible, and let someone close to you know how you are feeling."

Safety alert (PHQ-9 item 9)

If the self-harm question is answered above 0 (any option other than "Not at all"), an urgent box appears above the score whatever the total: **"Your safety matters most."** — "You mentioned having thoughts of death or self-harm. Please talk to someone right now — call Tele-MANAS at 14416 (free, 24×7) or 112 in an emergency, and tell a trusted person near you. These feelings can get better with support." Buttons: 📞 Call 14416 (<tel:14416>) and 🚒 112 (<tel:112>).

After the result

- Disclaimer: "This is a screening, not a diagnosis. Only a qualified professional can diagnose anxiety or depression. Scores can change — you can retake this in two weeks to see how you are doing."

- Next steps: "Try a breathing practice" → Ch 2; "Read the related chapter" → Ch 4 (after GAD-7) or Ch 5 (after PHQ-9); "Retake". Full help banner below.
 - Privacy line at the top: "Completely private — your answers stay in this browser tab and are never saved or sent anywhere." (Confirmed in code: answers are only React state; no localStorage, no network call.)
-

8. Help banner (components/manobal/HelpBanner.js)

Code comment: "Indian helplines. Numbers should be re-verified periodically before publishing."

Helplines listed exactly (full banner):

1. **Tele-MANAS (Govt. of India) — 14416** — alt **1-800-891-4416** — "24×7 · free · many languages"
2. **Emergency — 112** — "24×7"
3. **iCall (TISS) — 9152987821** — "Mon–Sat, 10 AM – 8 PM"
4. **Vandrevala Foundation — 9999666555** — "24×7 · call or WhatsApp"

Each is a `tel:` link (tap to call on phones).

- **Full version:** heading "Need to talk to someone right now?"; "Reaching out is a sign of strength. These helplines are confidential and staffed by trained counsellors."; the four helplines; footer note: "Astrology and self-help practices on VedicDhaam support reflection and wellbeing. They are not a substitute for a doctor, psychologist or psychiatrist."
 - **Compact version** (one line): "If you are in distress or having thoughts of harming yourself, please call **Tele-MANAS 14416** (24×7, free) or emergency **112**. You are not alone."
 - Where it appears: compact on the hub (below the hero), on both sub-pages and at the top of every chapter; full at the bottom of the hub, every chapter, the career page and the self-check result.
 - Other numbers in the section: Ch 9 text gives **1930** (national cyber-crime helpline) and **cybercrime.gov.in**; the mood tracker alert and self-check messages repeat 14416 / 112.
-

9. Privacy

- No Manobal component makes any network request or calls an API. There is no login or account for these features.
 - **Saved in the browser's localStorage only (this device / this browser):**
 - `vedicdhaam-manobal-progress` — completed chapter slugs (array)
 - `vedicdhaam-manobal-reflect-<slug>` — reflection answers per chapter (12 possible keys)
 - `vedicdhaam-manobal-thoughts` — thought records (array, max 50)
 - `vedicdhaam-manobal-mood` — daily mood, tags, note
 - `vedicdhaam-manobal-focus` — focus sessions completed per day
 - `vedicdhaam-manobal-gratitude` — three gratitude items per day
 - **Not saved at all:** Self-Check answers and scores, Career Compass answers, birth details and results (the Kundli is calculated in the browser), Breathing and Grounding.
 - On-page privacy claims: hub "100% private" and "Everything you write stays private on your own device"; reflections "saved only on this device, never sent anywhere"; self-check "never saved or sent anywhere".
-

- Consequences: data does not sync between devices or browsers; clearing site data or private/incognito browsing loses it; anyone using the same browser can see it. There is no in-app "delete all" or export (only single thought-record entries can be deleted; chapters can be un-marked).
-

10. Disclaimers and limitations

- **Not medical care:** help banner footer ("not a substitute for a doctor, psychologist or psychiatrist"); Ch 5 tip (does not replace diagnosis or treatment); Ch 10 (remedies complement, never replace, medical care or therapy); Ch 12 (astrologer "alongside, not instead of" professional care).
 - **Screening is not a diagnosis** (self-check disclaimer); retake suggested in two weeks.
 - **Astrology framed as a lens, not fate:** hub pillar ("a lens for self-knowledge, not a verdict"), Ch 1, Ch 8 ("never give up a genuine passion only because of a chart"), Ch 10 ("Genuine astrology empowers — it never frightens"; beware of anyone demanding large sums for remedies), Career Compass caution.
 - **Breathing safety:** stop if dizzy; skip breath-holds if pregnant or with heart/lung conditions (Ch 2 also mentions high blood pressure); see a doctor for first-time chest pain (Ch 4).
 - **Technical limits seen in code:**
 - Career Compass astrology is simplified: whole-sign 10th house from the Lagna, lord + occupants only (no aspects, D10 or dasha, although Ch 8 describes those). Birth place is limited to the 16 preset cities; missing birth time defaults to noon.
 - The bars show interest-only scores, while highlighted rows use the astro-boosted ranking, so a highlighted row may not be among the three longest bars.
 - Mood low-streak alert only counts back from today and needs today logged at ≤ 2 ; missing days break the streak.
 - Focus timer pauses after every phase (no auto-continue) and has no automatic long break after four rounds (Ch 7 text recommends one).
 - The comment in HelpBanner says helpline numbers must be re-verified periodically.
 - Hub stat "7 interactive tools" counts Career Compass; the toolkit itself has 6 tabs.
-

11. Styling notes (CSS)

- Calm teal palette: `--teal #2a9d8f`, `--teal-soft #e6f4f1`, `--teal-deep #1d6f66` (chapter CSS uses `#1f7a6f`).
 - Six chapter tones with their own colours: saffron, teal, violet, rose, green, indigo (hub card accents e.g. saffron `#f6a609`, violet `#7b5cc9`, rose `#e8577a`, green `#3c9a5f`, indigo `#4b4fbf`; chapter pages set `--accent` per tone).
 - Responsive breakpoints: hub 1100 / 900 / 560 px; chapter 1000 / 640 px; tools 900 / 560 px; self-check 600 px. Sticky elements on hub and chapter pages (chapter TOC).
 - Animations: hero orb `breathe` (8 s), floating emojis (6 s), `fade-up` on hero/results, `Reveal` scroll-in for cards.
-

APPENDIX A

Every file in the project

सभी फ़ाइलों की सूची

All source files in `app/`, `components/`, `lib/` and `public/`, with their line counts. Root files: `package.json`, `package-lock.json`, `next.config.mjs`, `jsconfig.json`, `README.md`, `.gitignore`, `astro.png`.
